Ricardo Devesa,2022-02-04 Trees have been deliberately connected with houses since they were introduced as a prominent part of architectural design The relationships of contiguity between houses and trees have existed since ancient times However at the end of the 19th century those links became explicit in the design process as the house emerged as one of the fundamental architectural programs and as the result of an increasing sensibility towards environmental aspects and the landscape The first part of this publication is to present a collection of exemplary five houses that evinced explicit relationships with pre existing trees The five twentieth century projects are La Casa B Rudofsky 1969 Cottage Caesar M Breuer 1951 Ville La Roche Le Corbusier P Jeanneret 1923 Villa Pepa J Navarro Baldeweg 1994 and Hexenhaus A P Smithson 1984 2002 The second part of the book contributes three theoretical concerns for the contemporary project those ones which are established in the process with respect to time place and outdoor domesticity in modern western housing One of these theoretical contributions establishes that any house located on a site finds a significant place in conjunction with the preexisting trees The second contribution describes the effects in terms of time in addition to spatial considerations which trees can contribute to the architectural project Finally the establishment of these connections between architecture and trees enlarges the idea of the house the tree serves to draw the surrounding environment into the house and as a result becomes an intrinsic part of the house itself Shoe Retailer and Boots and Shoes Weekly ,1908 **Lonely Planet**
