**Solving Common Pediatric Problems** Carmi Z. Margolis, 1988      **Practical Algorithms in Pediatric Endocrinology** Z. Hochberg, 2007-06-22 Algorithms provide a logical concise and cost effective approach to medical reasoning utilizing a concise step by step approach based upon clues from the history physical examination and laboratory studies algorithms help avoid excessive unnecessary procedures and testing The 2nd revised edition of Practical Algorithms in Pediatric Endocrinology deals with practical issues of child growth puberty diseases of the endocrine glands sexual differentiation as well as aberrations of water electrolyte mineral and carbohydrate metabolism Fifty clinical issues are covered by an algorithmic approach breaking down long lists and tables of differential diagnosis into smaller more manageable ones Common clinical symptoms signs and laboratory abnormalities are classified as they present themselves at the patients bedside This book is aimed at general practitioners and pediatricians in particular those who are not exposed to pediatric endocrine problems on a daily basis and at trainees in endocrinology and pediatric endocrinology as they acquire familiarity with clinical problem solving to make rational choices when facing clinical dilemmas A Karger Publishing Highlights 1890 2015 title      *Implementing Clinical Practice Guidelines* Carmi Z. Margolis, Shan Cretin, 1999 This book explains how to implement clinical practice guidelines effectively in order to help guideline users at any level get their job done It offers a systematic approach to guideline implementation based on understanding what clinical guidelines are how they work and how implementation techniques that have proved effective in other areas can be used to help implement them The book includes real case scenarios of guidelines implementation and questions and answers throughout the text regarding Solving clinical problems using clinical algorithms Developing and constructing practical guidelines Tailoring guidelines Implementing clinical practice guidelines Evaluating and monitoring clinical practice guidelines      *Practical Algorithms in Pediatric Hematology and Oncology* Richard H. Sills, 2003 This is the only comprehensive collection of algorithms which exclusively addresses hematologic and oncologic problems affecting neonates children and adolescents Examining clinical problems which challenge the pediatrician general practitioner and family practice physician each algorithm utilizes a concise step by step approach based upon clues from the history physical examination and laboratory studies The algorithms addressing differential diagnosis clearly distinguish between the most common etiologies those that are less frequent and finally some that are rare but important to recognize The 51 topics include evaluation of anemia sickle cell anemia thalassemia hemolytic anemia the bleeding child thrombocytopenia and other platelet disorders hemophilia leukocyte disorders leukemias lymphadenopathy splenomegaly approaches to mass lesions in the mediastinum abdomen pelvis bones and soft tissues as well as approaches to potential emergencies such as tumor lysis and superior vena cava syndromes The oncology topics emphasize diagnostic approach and management of complications and not the details of chemotherapy All algorithms are presented with a page of explanatory notes and a list of selected reading Pediatricians family physicians and

general practitioners will find this book very helpful in managing problems in their practices Trainees in pediatric hematology will find it a useful tool in developing approaches to solve the problems they will encounter and pediatric hematologists oncologists will find it useful as a teaching tool

**International Primary Care Computing** Glyn M. Hayes, Nicholas Robinson, 1991 Primary care or ambulatory care as it is sometimes called is a rapidly developing area of information technology Primary care workers both in developed and developing countries can greatly benefit from a comprehensive computer support system Currently most of the effort and investment in health care computing is made in hospital or secondary care As a result the needs of the primary care workers are often poorly understood or ignored in information technology research and development These proceedings in addition to discussing the aspects of computing which apply specifically to primary care provide an extensive bibliography of the subject which may form a valuable organizational basis for future study
