**Digital Nomads. How the era of digitalization creates alternative lifestyles** Lisa-Marie Wagner,2020-06-18  
Bachelor Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1  
6 language English abstract In this paper the phenomenon of digital nomadism in permanent employment is presented In  
general digital nomads are characterized by their independence of location their employment in the digital space and  
common values Most of them are freelancers and entrepreneurs but also employees who are part of this movement want to  
leave the conservative concept of normal employment and break new ground First the changes in the business world and the  
emergence of digital nomadism were presented in this paper Due to a lack of literature guideline based expert interviews  
were conducted to gain insight into the opportunities and risks of the multi local lifestyle concept for employees and  
companies In addition the framework conditions for companies and digital nomads required by this work and life concept  
were examined and presented in detail Such a framework condition can mean for example the adaptation of processes and  
leadership There are also differences between completely remote companies and only partially remote companies which can  
lead to a split company structure In this context the similarities and differences between traditional telework and digital  
nomadism in permanent employment were also examined These are similar for example regarding the technical prerequisites  
that should be created in companies and the changed communication In addition there are challenges and opportunities that  
arise from the travel component and the nature of digital nomadism such as negatively impaired processes due to time  
differences or certain characteristics and experiences that digital nomads possess or experience that can be used positively  
in a professional context Thus this work not only serves a scientific purpose but also provides a practical framework for  
employing digital nomads in traditional companies
