Chronic and Inflammatory Dry Eye and Its Treatments Toan A. Tran,2008 Millions of people suffer from different variations of dry eye Chronic dry eye and inflammatory dry eye are the most common forms of dry eye in patients The treatment for these two types of Dry Eye Syndromes can prove to be a difficult task for primary eye care physicians However with the vast amount of treatment modalities available it provides both

the doctor and patient with a variety of options In order for the physician to begin the diagnosis he or she will have to determine the cause of the dry eyes Next it is the physician s responsibility to educate the patient about the symptoms possible treatments and consequences of being noncomplaint Education increases the chances of a patient being complaint and the frequency in which he or she follow ups after the initial diagnosis Finnaly the physician must follow the proper treatment levels and continue with patient diagnosed with the dry eye condition Chronic and inflammatory dry eyes can be treated and improve a patient s lifestyle as long as the physician can convey the importance to the patient regarding the upkeep of treatment and constant care The physician should also continue his or her education regarding the different type of treatment modalities that are constantly evolving to advance the optometric field
