A Study of the Thematic Apperception Test (TAT) with Japanese Subjects Jennifer L. Gray,1999 The purpose of the study was to identify common themes on the Thematic Apperception Test TAT for Japanese subjects In addition Japanese TAT themes were compared with American TAT themes Stein 1981 for any significant differences It was hypothesized that significant differences in narrative themes would exist between Japanese and American subjects The subjects included sixty male and female college students attending courses in Tokyo Japan Subjects were enrolled in college courses during the administration of the test and ranged in age from 18 to 27 years of age All the participants were fluent in English allowing them to make responses in that language therefore eliminating the errors inherent in translation Japanese subjects were then compared with Morris I Stein s original study of eighty American males conducted in 1981 Ten of the original Murray TAT cards were used 1 2 3BM 4 6BM 7GF 8BM 10 11 and 14 Japanese narratives were then scored using five variables for each of the ten cards hero gender the incidence of death need for achievement dominant emotional tone and the outcome of the story In conclusion common TAT themes for Japanese subjects were identified for all ten of the cards that were administered Cards 1 2 4 8BM 10 11 and 14 shared many of the same themes for Japanese and American subjects On the other hand cards 3BM 6BM and 7GF varied in theme content for Japanese and American subjects These findings will help determine the validity and reliability of the TAT as an assessment tool for Japanese subjects and open the door for future studies of Asian populations in the United States as this population is underrepresented in much of the research and literature of today

Evocative Images Lon Gieser,Morris Isaac Stein,1999-01-01 For more than 6 decades psychologists have been exploring the needs drives sentiments complexes and conflicts of personality using the TAT Developed chiefly by Henry A Murray at the Harvard Psychological Clinic the TAT has worldwide uses in clinical military and industrial settings neuropsychological assessments forensic evaluations and creativity and motivation studies Yet researchers continue to debate its reliability and validity Despite the test s wide use and popularity no consensual scoring system or set of norms exists for the TAT In this book contributors retrace the roots of the TAT along with the circumstances that shaped and continue to shape the TAT s rich history theoretical and empirical grounding and continued practical value PsycINFO Database Record c 2004 APA all rights
