Wealth Of Forests

David Baud

Wealth Of Forests:

The Wealth of Forests Chris Tollefson, 1998 These are turbulent unpredictable yet opportune times for Canadian forestry Never before have competing demands on Canada's forest resources been so great At the same time we are finally being forced to confront the sustainable limit of these resources Now the improbable has happened government industry First Nations and NGOs appear to be part of an emerging consensus that industrial forestry in Canada must change *The Wealth of Forests* is a pioneering attempt to grapple with the policy implications of the transition to sustainable forestry While much has been written on the theory and practice of sustainable forestry and on the relative merits of regulatory versus market approaches to environmental protection these literatures have not as yet been bridged Using illustrations based on recent developments in British Columbia forest policy this collection provides that bridge by analyzing the potential and limits of market regulatory and other policy instruments as means of achieving sustainability Featuring new work by many of Canada's leading forest policy scholars this interdisciplinary collection is devoted to translating the concept of sustainability into practice in key areas of forest policy including tenure timber pricing forest practices land use zoning and eco certification *The Wealth of Forests* also considers how domestic and international legal regimes might constrain the adoption of policies that could bring us close to the elusive goal of sustainable forestry

The Forest Wealth of Oregon Edmund P. Sheldon, 1904 **American Forests and Forest Life**, 1928 **The Wealth and Beauty of Our Forests** South Australian Perpetual Forests Ltd, 1953 **Trees of Life** Kenton Miller, Laura Tangley, 1991-04-30 Staggering statistics and dramatic headlines about the destruction of rain forests the world's richest ecosystems are only a small part of the devastating story of global deforestation This volume provides comprehensive coverage of this complex scientific and political catastrophe in the making and examines the costs and the consequences in human economic and ecological terms Also a survey of both contemporary and historical assaults on the

world's forests along with their impact on the dependency of native peoples and cultures is chronicled. Specifically within developing nations the relationships among poverty, population growth, and short-sighted government policies are calculated to be fundamental elements in the acceleration of tropical deforestation. With a special section on North America's old-growth forests, a glossary of special terms, an account of both the importance and relevance of arboreal genetic diversity, an extended list of suggested readings, and appendices listing international and federal organizations which offer educational materials for both individual and classroom use, this book offers important practical resources and makes clear the social, economic, and biological costs of continued global deforestation.
