## Indeterminate VS Determinate

Comparison between Indeterminate and Determinate

- Influence lines for statically determinate structures are always piecewise linear.
- For indeterminate structures, the influence line is not straight lines!

## Structures Of Influence:

**A Structural Theory of Social Influence** Noah E. Friedkin,2006-11-02 This book describes how a network of interpersonal influence can operate to form agreements among persons who occupy different positions in a group or organization It presents an account of consensus formation that is unique in its integration of work from the fields of social psychology and sociology concerned with group dynamics and social structures *The Five Structures - Supporters (Influence Structure)* Joey Yap ,2010-04-01 Understand How You Approach the World While your Day Master shows you who you are your Structure tells you about your behaviour and attitude in relation to the world Each book in this series focuses on one specific Structure and provides ideal careers job roles and wealth paths for the Structure In other words these 5 guides will provide the blueprint to knowing why some people are the way they are and what to do to help you deal with the varied and colourful characters in your life

**Influence Structures and Information Aggregation in Groups** Helge Klapper,Boris Maciejovsky,Phanish Puranam,Markus G. Reitzig,2022 Group decision making in organizations often occurs in the context of influence relationships We develop a theory anchored in a computational model to analyze the conditions under which social influence structures aid or hurt information aggregation We find that a group is most likely to achieve high accuracy through information aggregation when its overall influence structure which at the dyadic level may have both informational and normative effects resembles a single non clustered component When clustering is low while preserving a chain of connectivity throughout the group such that there are few isolates information distributed in the group can be aggregated effectively This wisdom of communities through social influence can be superior to the wisdom of crowds obtained by pooling individual estimates We also discuss why laboratory studies may systematically underestimate the ability of groups with social influence to obtain accurate aggregate information as well as some interventions to improve group accuracy by manipulating the influence structure indirectly via group composition

**Influence Models in Group Decision-Making** Hang Luo,2025-11-12 This book examines influence among decision makers in group decision making It is quite common that people influence and are influenced by each other in group decision making Likewise artificial intelligences can influence and be influenced by each other in interaction or collaboration and both a person and an artificial intelligence can be called an agent The author explores how humans or artificial intelligences can interact with and influence each other during the decision making process where such influence can reshape the outcome of the group decision With an interdisciplinary approach various applications are considered including computer science distributed computing distributed artificial intelligence particularly multi agent system economics and management joint stock company voting and politics domestic elections and international organization decision making The book presents settings of group decision making where agents preferences choices are influenced and thus changed by each other As the influence of reality faced by an agent usually comes from more than one agent simultaneously the author provides both cardinal and ordinal approaches

building social influence functions and a matrix influence function to address multiple sources of influence in group decision making To better describe the complex influence in reality the author provides a framework of the three levels of influence and its mathematical models to address individual coalitional and structural influence and their mixed effects in the context of group decision making Even though it is not easy to address the influence of structures on an agent as the influencing subject and the influenced object are disparate the former is the inter relationships between agents while the latter is the preference choice of a single agent Furthermore the author considers combinatorial and collective decision making and provides a framework model of influence across multiple agents and issues
