*Structure and Evolutionary History of the Solar System* H. Alfvén, Gustaf Arrhenius, 2012-12-06 This monograph is based on four papers which have been published in *Astrophysics and Space Sciences* 1970 1974 They contain the results of our joint work started in 1968 at the University of California San Diego in La Jolla The work was based on the belief that the complicated processes by which our solar system was formed can only be clarified by close collaboration between representatives of the physical and chemical sciences Our investigations have also been strongly supported by work at other institutions especially by a group at the Royal Institute of Technology Stockholm where a number of plasma experiments have been made in order to clarify basic processes which are relevant to cosmogonic problems These experiments were in their turn inspired by theoretical work on primordial processes carried out during the last thirty five years We especially want to acknowledge the contributions by Drs N Herlofson B Lehnert C G Fiilthammar and Lars Danielsson in Stockholm and by Drs J *Nuclear Science Abstracts* ,1974 **Evolution of the Solar System** Hannes Alfvén, Gustaf Arrhenius, 1976
