Schwarzman,2011-02 A practical guide to managing technical writing projects and tech writing departments covering hiring evaluation management internal and external customer relations estimating and tracking tech writing projects running a tech writing business as a solo contractor or as a manager selling writing services contracts and work orders outsourcing technical training development delivery and more From the Introduction There are many books available on the techniques of technical writing primarily for beginners and practitioners of tech writing But there are very few books on how to manage the technical writing group in a company or how to manage a technical writing business whether you re on your own as a freelancer or you have writers working for you If you are a tech writer who manages other writers or if you are a non writer who manages writers this book is for you The sections on managing tech writing projects show a methodology specific to technical documentation If you want to learn general management and project management techniques and you should that information already exists What this book aims for is to provide you as a manager of technical writing with the specifics that

you won't easily find elsewhere. Secondly, this book aims to give new managers and future managers a leg up on how to actually run a technical publications group based on some 20 years of experience in the field. There are different situations in which someone becomes a manager of a technical publications group. Sometimes a writer grows into the role within a company as the department grows; sometimes tech writers are subsumed under some other group. I've seen writers belonging to support, testing, marketing, and infrastructure groups, and the person in charge of technical writing in the company isn't actually a writer and may never have been one. Tech writers who set up their own freelance business have their own specific needs; not only are they the managers, they're also the writers. Finally, owners or managers of tech writing agencies, whether or not they are writers themselves, have business issues specific to a tech writing business to consider.
