Jon Evans,2014-05-14 Patch knows something is direly wrong when all the squirrels in Central Park wake to find every  
foodstore stolen and in the middle of winter that means starvation Patch s mother is gone without a trace and in her den  
drifts a musky unfamiliar scent Hungry tired and alone Patch sets off into the mountains the human lands of New York City to  
find food and to uncover what s happening to his family He finds out too late that a war is brewing beneath his paws Patch is  
swept into an deadly battle that unites squirrels birds cats and dogs against vicious forces below the ground rumoured to be  
led by the mysterious legendary King Beneath Gripping and suspenseful Beasts of New York is a gritty urban fantasy  
populated by unforgettable characters as vivid and complicated as humans from mercurial Zelina the Queen of All Cats to  
Snout a massive and power hungry rat to Karmerruk an arrogant dangerous hawk Evans s New York City of wildlife is deeply  
imagined the urban landscape wavers between the familiar and the disturbingly bizarre while Jim Westergard s intricate

computer machinery sunk costs maintenance building space heating venting cooling and so on into software for all kinds of  
digital and analog hardware for over sixty years Far longer if you consider punched cards and so on In the end most of the  
source code ends in the waste heap of history Old code gets forgotten rub bished and a new wave of developers is forced to  
recreate new versions of old ideas People get promoted graduate from college and leave to get married before they do they

don't have time don't believe in the priority and don't place the code where others can find it to make an important curation of their software and by this donate it to future generations worldwide the society at large If organizations at the other end of the spectrum would realign software for a legacy of centuries instead of product runs mankind can preserve the sunk costs speed up advancement and make software impact far wider when it's made in a reusable form People move to a new job and remake linked lists factory classes or ring buffers in the new language of the day or within the design paradigm of the latest fad management It's kind of insane when you think about it people spend many years getting a consumer product working finely tuned and profitable Then two companies merge product lines are unified or obsoleted and some or all of the intellectual property gets forgotten in a corner as one team is merged and the others retire to golf or the pool While filling in cardboard boxes of stuff as they leave does anyone drag out the old tapes and floppies to make sure the new guys aren't starting by reinventing the wheel
