Communication of Structural Design Institution of Structural Engineers (Great Britain),1975 Uses of Structure in Communication Studies Richard L. Conville,1994 Conville has assembled a collection of essays that share a consideration of structure as it manifests itself in human communication Personal stories accounts of events narratives diaries and unstructured interviews are ever more widely appreciated today as valid data for understanding human cognition and human interaction Some chapters present solutions to the problem of how to analyze such materials and how to conceptualize them as data Other chapters argue for the inevitability of structure in communication study Still other chapters demonstrate structure in human communication What ties all of the chapters together is the idea that structure is ubiquitous in communication literature even in the face of postmodern and poststructuralist critiques alleging the disappearance of structure the fragmentation of culture and the impossibility of communicating across boundaries As the authors demonstrate the concept of structure enters the scholarly conversation by way of such diverse and sometimes unexpected vehicles as dialectical theory relationship development deconstruction relational communication and narrative theory **Psychology** Charles Arthur Mercier,1901 It has long been a favourite tenet of mine and there are now I think others who hold it that Insanity is no exception to the rule which requires a knowledge of the normal as an indispensable preliminary to a knowledge of the abnormal The reason why the contrary opinion has been maintained with such vigour and the contrary practice so generally followed has seemed to me to be the absence of any work in which normal psychological processes are dealt with from the point of view and for the purposes of the alienist Of the many excellent works on Psychology which are at the service of the student there is none that affords him material help in understanding the nature of those disorders of mind which it is the work of his life to study For instance the chief labours of the student of the disordered mind are concerned with the existence and nature of Delusion but as far as I know no work on normal psychology gives him any help in settling the preliminary questions of what a delusion is of how it differs from a normal state of mind of its mode of origin or of its varieties It is true that these are not questions in normal psychology and it is no reproach to the psychologist who deals with the normal alone that they are excluded from his purview but it is a great disadvantage to the alienist to be left without guidance in the face of problems of such profound importance to him **An Examination of Structural Communication in Light of Current Instructional Techniques and Ideas of Learning** Richard Bolen Whittington,1974 Contributions to Structural Communication Complexity Henning Wunderlich,2009 The Law Reports Great Britain.
