International Symposium for Intelligent Transportation and Smart City (ITASC) 2019 Proceedings Xiaoqing Zeng,Xiongyao Xie,Jian Sun,Limin Ma,Yinong Chen,2019-04-09 This book presents research advances in intelligent transportation and smart cities in detail mainly focusing on green traffic and urban utility tunnels presented at the 4th International Symposium for Intelligent Transportation and Smart City ITASC held at Tongji University Shanghai on May 8 10 2019 It discusses a number of hot topics such as the 2BMW system Bus Bike Metro and Walking transportation safety and environmental protection urban utility design and application as well as the application of BIM Building Information Modeling in city design By connecting the theory and applications of intelligent transportation in smart cities it enhances traffic efficiency and quality The book gathers numerous selected papers and lectures including contributions from respected scholars and the latest engineering advances to provide guidance to researchers in the field of transportation and urban planning at universities and in related industries The first conference in the ITASC series was held in 2013 as a workshop of the International Symposium on Autonomous Decentralized System ISADS in Mexico City The second and third were held in May 2015 and May 2017 respectively in Tongji University Shanghai

*Game Theory for Wireless Communications and Networking* Yan Zhang,Mohsen Guizani,2011-06-23 This comprehensive technical guide explains game theory basics architectures protocols security models open research issues and cutting edge advances and applications Describing how to employ game theory in infrastructure based wireless networks and multihop networks to reduce power consumption it facilitates quick and easy reference to related optimization and algorithm methodologies The book explains how to apply the game theoretic model to address resource allocation congestion control attacks routing energy management packet forwarding and MAC

**Smart Materials and Structures** G.R Tomlinson,W.A Bullough,1998-01-01 Significant changes have occurred in materials science including increasing demands on life extensions and the reliability and exploitability of components materials and structures These changes provide smart technologies with excellent application opportunities in aerospace civil and electrical engineering transportation manufacturing communications defense and medicine Smart Materials and Structures presents an overview of current developments in the characterization and applications of materials and actuators issues surrounding their control and the integration of smart systems and technologies This compendium provides a valuable synopsis of this rapidly expanding and topical research field for engineers program managers technologists physicists materials scientists and mathematicians working to advance smart materials research methods their applications and robotic technologies

*Plug In Electric Vehicles in Smart Grids* Sumedha Rajakaruna,Farhad Shahnia,Arindam Ghosh,2014-11-29 This book highlights the cutting edge research on energy management within smart grids with significant deployment of Plug in Electric Vehicles PEV These vehicles not only can be a significant electrical power consumer during Grid to Vehicle G2V charging mode they can also be smartly utilized as a controlled source of

electrical power when they are used in Vehicle to Grid V2G operating mode Electricity Price Time of Use Tariffs Quality of Service Social Welfare as well as electrical parameters of the network are all different criteria considered by the researchers when developing energy management techniques for PEVs Risk averse stochastic energy hub management maximizing profits in ancillary service markets power market bidding strategies for fleets of PEVs energy management of PEVs in the presence of renewable energy in distribution lines or microgrids and loss minimization in distribution networks based on smart coordination approaches using real time energy prices are some of the attractive and novel topics explored in this book It will be an excellent reference for graduate students researchers and industry professionals who are interested in getting a snapshot view of today s latest research on applying various smart energy management strategies for smart grids with high penetration of PEVs
