**On Teaching and Learning** Jane Vella, 2014-07-17 On Teaching and Learning takes the ideas explored in renowned educator Jane Vella's best-selling book *Learning to Listen Learning to Teach* to the next level and explores how dialogue education has been applied in educational settings around the world. Throughout the book she shows how to put the principles and practices of dialogue education into action and uses illustrative stories and examples from her extensive travels. Dialogue education values inquiry, integrity, and commitment to equity values that are also central to democracy. Learners are treated as beings worthy of respect, recognized for the knowledge and experience they bring to the learning experience. Dialogue education emphasizes the importance of safety and belonging. It is an approach that welcomes one's certainties and one's questions.

**Contextual Teaching and Learning** Elaine B. Johnson, 2002 Dr. Johnson's book is far more than a how-to guide for constructing meaningful learning activities for students. It is the definitive treatise on the fundamental concepts of acquiring and transferring knowledge. This is an invaluable contribution. Arlene H. Parisot, Director of Workforce Department, Office of Commissioner of Higher Education, Montana State System. This is a must-read for all teachers and administrators in their search for meaning. Elaine Johnson has artfully captured the essence of the best practices conversation taking place in schools today by speaking directly to the heart of classroom experience. Stephen Olczak, Principal, Reynolds High School, Oregon. Contextual teaching and learning (CTL) is a system for teaching that is grounded in brain research. Brain research indicates that we learn best when we see meaning in new tasks and material and we discover meaning when we are able to connect new information with our existing knowledge and experiences. Students learn best according to neuroscience when they can connect the content of academic lessons with the context of their own daily lives. Johnson discusses the elements of the brain-compatible contextual teaching and learning system, making meaningful connections, investing school work with significance, self-regulated learning, collaboration, critical and creative thinking, nurturing the individual, reaching high standards, and using authentic assessment. Drawing on the practices of teachers in kindergarten through university, Johnson provides numerous examples of how to use each part of the CTL system. *Contextual Teaching and Learning: What It Is and Why It's Here to Stay* is more than a handbook on precise steps to follow to help children of all abilities achieve high standards by joining academic lessons with their immediate context. This book also explains how the brain works, discusses why teachers need to pay attention to context, and makes a strong case for the need to teach students to think critically and creatively. This inspirational book urges educators to eliminate the student question, "Why do we have to learn this?" If the educators invest learning with meaning by relying on context, that question won't have to be asked.

**Teaching as Learning** Jean McNiff, 1993-01 In this fascinating and very personal book, Jean McNiff, author of the successful *Action Research: Principles and Practice*, argues that educational knowledge is created by individual teachers as they attempt to express their own values in their professional lives. Working with case studies of actual practice, she looks again at the

familiar action research paradigm of identifying a problem imagining implementing and evaluating a solution and modifying practice in the light of that evaluation She gives practical advice on how working in this way can aid the professional development of action researcher and practitioner alike She concludes that the best teaching is done by those who want to learn and who can show others how to be open to their own processes of self development
