Values Across The Curriculum:

Values Across the Curriculum Peter Tomlinson, Margret Quinton, 2019-08-13 The background to this book first published in 1986 and its underlying concern lies with those aspects of education which relate to values Amongst these moral and social values are often thought of as central and they are the title's primary concerns The study also deals with the value aspects and implications of the major areas of the sec Teaching Values Across the Curriculum Steve Godden, Allan Langoulant, 2004-01-01 This book is a wonderful resource for an across the school planning approach to linking values into the whole school curriculum *Teaching Values and Citizenship Across the Curriculum* Richard Bailey, 2014-05-12 This text presents the issues and principles for teaching values and citizenship at both primary and secondary levels based on the Crick Report and DfEE TTA guidelines It covers the whole of the curriculum and is supported by examples and key stage activities throughout *Teaching Values and Citizenship Across the Curriculum* Richard Bailey, 2000 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company **Values Education and Quality Teaching** Terence Lovat, Ron Toomey, 2009-04-07 Some revision of public schooling history is necessary to challenge the dominant mythology that public schools were established on the grounds of values neutrality In fact those responsible for the foundations of public education in Australia were sufficiently pragmatic to know that its success relied on its charter being in accord with public sentiment Part of the pragmatism was in convincing those whose main experience of education had been through some form of church based education that state based education was capable of meeting the same ends Hence the documents of the 1870s and 1880s that contained the charters of the various state and territory systems witness to a breadth of vision about the scope of education Beyond the standard goals of literacy and numeracy education was said to be capable of assuring personal morality for each individual and a suitable citizenry for the soon to be new nation As an instance the NSW Public Instruction Act of 1880 cf NSW 1912 under the rubric of religious teaching stressed the need for students to be inculcated into the values of their society including understanding the role that religious values had played in forming that society's legal codes and social ethics The notion therefore that public education is part of a deep and ancient heritage around values neutrality is mistaken and in need of serious revision The evidence suggests that public education's initial conception was of being the complete educator not only of young people's minds but of their inner character as well

Reasons for Living Marisa L. Crawford, Graham Rossiter, 2006 *Reasons for Living* begins by exploring the development and psychological function of meaning identity and spirituality in the lives of young people This exploration can contribute significantly to the professional background of those engaged in the education and care of youth in various contexts The book then focuses on what it means to educate young people in meaning identity and spirituality Implications are considered for three school contexts the spiritual and moral dimension to the general curriculum in public and independent schools religious education in religious schools and state based Religion Studies courses *Reasons for Living* makes a much needed

contribution to the philosophy of education by discussing the links between education and young people's spiritual and moral development. It also provides new insights and approaches to values education and religious education. Areas of fundamental importance in Australian education have long been held back not only by the gap between theory and practice but also by the very complexities of young people's personal development in contemporary Western Culture. *Reasons for Living* offers a constructive and practical way forward.

International Handbook of the Religious, Moral and Spiritual Dimensions in Education Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04. Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion. Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion. One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle. This *International Handbook* presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education. The result is a collection of essays which reflects the discipline in all of its internationality as it is today. Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society. As well it offers a vision for the emergence of a peaceful and just world.

Educating for Values-Driven Leadership Mary C. Gentile, 2013-08-29. Despite four decades of good faith effort to teach ethics in business schools you'll still find today headlines about egregious excess and scandal. It becomes reasonable to ask why these efforts have not been working. Business faculty in ethics courses spend a lot of time teaching theories of ethical reasoning and analyzing those big thorny dilemmas triggering what one professor called ethics fatigue. But what if faculty stopped focusing on ethical analysis and focused on a new curriculum one that builds a conversation across the core curriculum not only in ethics courses and also provides the teaching aids for a new way of thinking about ethics education. This is where *Giving Voice to Values* (GVV) comes in. The GVV curriculum asks the question: What if I were going to act on my values? What would I say and do? How could I be most effective? This book will help faculty across the business curriculum with examples, strategies and assistance in applying the GVV approach. In addition to an introductory chapter which explains the rationale and strategy behind GVV there are twelve individual chapters by faculty from the major business functional areas and from faculty representing different geographic regions. The book is a useful guide for faculty from any business discipline on HOW to use the GVV approach in his or her teaching.
