Haglund, 2015-03-25 *Ethnic Diasporas and the Canada United States Security Community* focuses on three diasporas and their impact on North American security relations the Irish and Germans which were mainly in the US and the Muslim diaspora which is based in both countries The book begins by examining the evolution of North America from a zone of war to a zone of peace i.e. a security community starting with the debate over the nature and meaning of the Canada US border It then assesses the role of ethnic diasporas in North American security looking as to whether ethnic interest groups have been gaining influence over the shaping of the US foreign policy This debate is also valid in Canada especially given the practice of federal political parties of catering to blocs of ethnic voters The second section of the book focuses on three case studies The first examines the impact of the Irish Americans on the quality of security relations between the US and the UK and therefore between the former and Canada The second looks at an even larger diaspora the German Americans whose political agenda by the start of twentieth century attempted to discourage Anglo American entente and eventual alliance The final case concentrates on the debates around the North American Muslim diaspora in the past two decades a time when policy

attention turned toward the greater Middle East which in many ways constitute the kin community of this politically active diaspora This comparative assessment of the three cases provides contextualization for today s discussion of homegrown terrorism and its implication for bilateral security cooperation in North America *The New Border Wars* Klaus Dodds,2021-09-28 An enlightening look at contemporary border tensions from the Gaza Strip to the space race by one of the world s leading experts in geopolitics Border expert Klaus Dodds journeys into the geopolitical clashes of tomorrow in an eye opening tour of border walls both literal and figurative In the Himalayas the Mediterranean and elsewhere the tension inherent to trying to divide the world into separate parcels has not gone away And with climate change shifting our natural borders from mountains to glaciers to rivers the question of how we live in a world that s becoming warmer and wetter and growing in population looms large With wide ranging insight and provocative analysis Dodds shows why we are more likely to see more walls barriers and securitization in our daily lives *The New Border Wars* examines just what borders truly mean in the modern world How are they built what do they signify for citizens and governments and how do they help us understand our political past and most importantly our diplomatic future *From Apocalypse to Way of Life* Frederick Buell,2004-03-01 *From Apocalypse to Way of Life* is a comprehensive and in depth survey of environmental crisis as it has been understood for the last four decades Buell recounts the growing number of ecological and social problems critical for the environment and the impact that the growing experience with and understanding of them has had on American politics society and culture *Vanishing Borders* Boon Thong Lee,Shamsul Bahrin (Tunku),2018 **Environmental Change and Security Project Report** ,2001 **The Politics of Good Neighbourhood** Béla Filep,2016-10-04 Analyzing neighbourly relations in multicultural societies this book develops a concept of good neighbourhood and argues that cultural capital in various forms is the determining variable in building good neighbourly relations This work breaks new ground by offering a conceptual integration of different mutually interdependent forms of capital intercultural capital cross cultural social capital and multicultural capital These forms of capital are linked to different educational and cultural policies of the state as well as to civil society involvement at different levels of implementation Grounded in extensive fieldwork the book not only provides critical insights into neighbourly relations in culturally diverse border regions of East Central Europe but the concept developed through a rich theoretical base can be usefully adapted and widely applied to other contexts Scholars and graduate level students in geography international relations political science social anthropology and sociology as well as policy practitioners with an interest in the negotiation of coexistence minority issues and social and political cohesion in multicultural societies will find this an illuminating read *Homeland Security: Borders and points of entry* James J.
