Social Psychology Catherine A. Sanderson, 2009-12-02 Catherine Sanderson's Social Psychology will help open students' minds to a world beyond their own experience so that they will better understand themselves and others. Sanderson's uniquely powerful program of learning resources was built to support you in moving students from passive observers to active course participants. Go further in applying social psychology to everyday life. Sanderson includes application boxes on law, media, environment, business, health, and education in every chapter right as the relevant material is introduced rather than at the end of the book. This allows students to make an immediate connection between the concept and the relevant application and provides a streamlined 15-chapter organization that helps you cover more of the material in a term.

Galen's Prophecy Jerome Kagan, 2018-10-08 Nearly two thousand years ago a physician named Galen of Pergamon suggested that much of the variation in human behavior could be explained by an individual's temperament. Since that time, inborn dispositions have fallen in and out of favor. Based on fifteen years of research, Galen's Prophecy now provides fresh insights into these complex questions, offering startling new evidence to support Galen's ancient classification of melancholic and sanguine adults. Integrating evidence and ideas from biology, philosophy, and psychology, Jerome Kagan examines the implications of the idea of temperament for aggressive behavior, conscience, psychopathology, and the degree to which each of us can be expected to control our deepest emotions.

Raising Capable Kids Deborah Winking, 2024-06-21 Many children are labelled different by doctors, psychologists, educators, or even peers, and as parents, this label can limit our hopes and expectations for them. Although the challenges that come with these labels are very real and can be daunting, all of our children can be raised to be strong, capable, curious humans. This book brings together the 12 habits you need to set your child up for success, regardless of diagnosis. Chapters range from defining what capable means for your child and setting expectations for how others treat your child to challenging your child in safe ways and helping your child build a narrative of strength. With true stories that bring each habit to life, the neuroscience underpinning each habit, activities that encourage reflection, and practical application, this is a game-changing guide to understanding, supporting, and celebrating your extraordinary child.

Before the Law Cary Wolfe, 2013 Animal studies and biopolitics are two of the most dynamic areas of interdisciplinary scholarship, but until now they have had little to say to each other. Bringing these two emergent areas of thought into direct conversation in *Before the Law*, Cary Wolfe fosters a new discussion about the status of nonhuman animals and the shared plight of humans and animals under biopolitics. Wolfe argues that the human-animal distinction must be supplemented with the central distinction of biopolitics: the difference between those animals that are members of a community and those that are deemed killable but not murderable. From this understanding, we can begin to make sense of the fact that this distinction prevails within both the human and animal domains and address such difficult issues as why we afford some animals unprecedented levels of care and recognition while subjecting others to unparalleled forms of brutality.

and exploitation Engaging with many major figures in biopolitical thought from Heidegger Arendt and Foucault to Agamben Esposito and Derrida Wolfe explores how biopolitics can help us understand both the ethical and political dimensions of the current questions surrounding the rights of animals
