provides a comprehensive and accessible introduction to an array of models of teaching and learning. Written in a clear, engaging and accessible style, the authors offer a wide range of teaching strategies that have been developed, polished, and studied over the last thirty years. Rather than being formulas to be followed word for word, each model draws teachers into the study of how students learn, promoting reflective action research in the classroom. Some of the models have been proven not only to accelerate learning but also to allow pupils to engage in alternative modes of inquiry which have been almost impossible to generate through traditional chalk and talk teaching. Updated features include a foreword by Estelle Morris, a new chapter on teaching adolescents with disabilities to read, a wealth of new scenarios and examples with clear guidelines for implementation, a new synectics study, new research and illustrations, a revised Picture Word Inductive Model, revisions and updates to ten chapters, and an updated appendix on Peer Coaching Guides.
