Teaching Children Science Joseph Abruscato,Donald A. DeRosa,2010 Science is a quest for explanations This popular text continues to encourage teachers to help their students learn through discovery while also providing content on the latest techniques in science teaching This edition has been thoroughly revised and features a new co author Dr Donald DeRosa of Boston University and a larger trim size and paperback binding for a fresher more open feel The book continues to use its well regarded pedagogy to help students to learn science They are A Look

Ahead topics to be discussed in the chapter Make the Case A reflective exercise that can be done individually or as a group
Summary A review of the main ideas in the chapter Going Further Learning activities for further study Resources for
Discovery Learning A listing of websites books and articles for further reference This establishes a solid foundation in science
pedagogy upon which they can build in later years The 5 E s of Learning and Universal Design for Learning have been added
to this edition and every chapter correlates to the NSE Content Standards A new chapter on using technology in the
classroom continues to build on the authors belief that technology can enhance learning in the science classroom The new
package includes links to video and web resources on the MyEducationLab website New To This Edition NEW Features a
new co author in this edition Dr Donald DeRosa of Boston University NEW A new paperback binding and larger 8 1 2 x 11
trim size gives the book a fresher and more open feel NEW Includes a new chapter Chapter 8 Using Technology to Enhance
Science Learning NEW Gives an increased focus on technology multimedia engineering and energy conservation Includes a
new Part IV on The Technological Sciences and more earth friendly and green science activities in this edition NEW Fully
integrated package Each chapter correlates to video and web resources within the MyEducationLab website The MyLab
series from Pearson offers innovative homework student assessment and multimedia instructional tools designed to enrich
the learning experience and improve course outcomes With detailed gradebook and customization options instructors can
easily monitor student progress and save valuable time NEW Includes The 5 E s Learning Cycle The 5 E s learning cycle is an
instructional design model that presents a framework for constructivist learning theories that can be effectively used in
teaching science Engage The task is introduced Using connections to past learning demonstrations of an event and asking
pointed questions the teacher can spark the students interest right away Explore While the teacher facilitates students take
part in hands on activities that allow them to work with materials Questioning sharing and communication with other
learners should be encouraged during this stage Explain Here the focus is on analysis Students are encouraged to put
observations questions hypotheses and experiences into language Communication between students and groups will aid
student learning Again the teacher is the facilitator leading discussions asking questions giving definitions of helping
students find the right words to describe their experiences Elaborate Extend Now students should be encouraged build and
expand upon what they have learned so far making deductions and inferences They can apply what they have learned to real
world situations Evaluate Evaluation should be ongoing and should occur at all stages in order to determine that learning
objectives have been met The teacher can use any assessment tool that they deem appropriate At this time the teacher
should encourage further study that builds upon what has been learned NEW Universal Design for Learning will be
incorporated in Chapter 9 Adapting the Science Curriculum Universal design is an approach to designing course instruction
materials and content to benefit students of all learning styles Universal design provides equal access to learning not simply
equal access to information This design model allows the student to control the method of accessing information while the

teacher monitors the learning process and initiates any beneficial methods Although this design enables the student to be self sufficient the teacher is still responsible for imparting knowledge and facilitating the learning process The classroom becomes a positive learning experience for all students while minimizing the appearance that special accommodations are being made for any individual student NEW Reorganizes Parts II through IV to be more reader friendly The A and B subchapters of the previous edition will be broken out into content chapters and activities chapters NEW Teaches novice instructors how to differentiate among good and bad science kits and how to utilize them effectively in the classroom
