Teaching School:

The Art of Teaching School Josiah Rhinehart Sypher,1872 **Teaching School Mathematics: Pre-Algebra**

Hung-Hsi Wu:,2016-06-29 This is a systematic exposition of a major part of the mathematics of grades 5 to 8 excluding statistics written specifically for Common Core era teachers It differs from other books for teachers in that the mathematics is correct in the sense that all the concepts are clearly and correctly defined and a grade appropriate explanation that is proof is given for every assertion For example it gives a precise definition of percent and explains how to use the definition to do all the standard problems about percent in an entirely routine manner It also gives a leisurely explanation for negative times negative is positive Another key feature is an intuitive introduction to plane geometry via rotations translations reflections and dilations that instead of treating these transformations as merely fun activities shows how they make sense of the usual geometric topics in middle school including congruence similarity length area and volume In short the readers will find in this volume a clear explanation of whatever was once puzzling to them in the mathematics of grades 5 to 8

School-to-School Collaboration Enhancing Teaching Guangbao Fang,2025-07-11 In an era where educational disparity poses a significant challenge this book explores the transformative power of school to school collaboration through the development of the Education Group in China The chapters cover one of the critical forms of school to school collaboration in China the Education Group which was adopted to address the educational gaps among schools and between regions Through an in depth case study of education groups the book unveils how these collaborations serve as a strategic tool to enhance teaching quality and bridge the education divide With a focus on the intricacies of implementation strategies and the multifaceted impacts on teachers the case study offers a comprehensive look into the mechanics and outcomes of educational groups in China With special attention paid to this form of school to school collaboration the book debates how it influences teachers in China applying both the organisational neo institutionalism theory and the network governance theory to assess the developing trajectory of the education group in China and investigate its impact on teachers This book is an essential resource for academics and students in the field of educational sciences who are interested in the impact of policy and collaboration on teaching quality It is also a viable resource for teachers and school leaders looking for actionable strategies to enhance collaborative efforts
