

Generation of Alternatives

This technique emphasizes the importance of developing multiple potential solutions to a problem, rather than focusing solely on a single answer.

Challenging Assumptions

This technique encourages individuals to question pre-existing assumptions and consider other possibilities.

Suspended Judgement

This technique involves withholding criticism or judgement of ideas during the creative process.

Fractionation

This technique involves breaking down a problem or situation into smaller parts and considering each one separately.

Lateral Thinking Techniques

Edward Debono

Choice of Entry Point

This technique involves deciding where to start when approaching a problem (the entry point) and determining which areas to focus on (the attention area).

Random Simulation

This technique involves using a random stimulus (like a word, image, or idea) as a starting point for idea generation.

Analogies

This technique involves drawing comparisons between the problem at hand and something else that might seem unrelated.

Brainstorming

This is a group creativity technique where participants come up with as many ideas as possible within a given timeframe.

The Reversal Method

This technique involves turning a problem or situation on its head to see it from a new angle.

Techniques For Teaching Thinking:

Techniques for Teaching Thinking Arthur L. Costa, Lawrence F. Lowery, 2016-07-15 Originally published in 1989 the purpose of this title was to provide information and ideas for Staff Developers and Teacher Educators as they consider program content to prepare teachers to teach thinking skills Teachers as they assess their own abilities to create classroom conditions for thinking and their readiness to implement a curriculum for developing thinking skills Curriculum Developers as they decide how the curriculum should be organized and sequenced according to children's developmental levels Administrators as they assess and provide leadership for improving the conditions in their schools and classrooms which allows the stimulating teaching of thinking Although written some time ago the information is still valid today Teaching Thinking Robert J. Swartz, David N. Perkins, 1990 This teaching guide provides an integrated framework for teaching thinking skills which involves both teaching thinking in a separate program or course and infusing the teaching of thinking into standard subject area instruction across the curriculum Individual chapters deal with the following topics 1 the nature of thinking skills and evidence that people can learn to think better 2 the improvement of thinking 3 kinds of thinking broad categories specialized kinds of thinking metacognition and some thinking frameworks 4 the infusion of teaching thinking into regular subject area instruction 5 choosing and using separate instructional programs designed to teach thinking 6 program development and selection of thinking skill goals 7 lesson design and instructional strategies structured thinking teaching for transfer and metacognition 8 support systems for teachers and schools in the teaching of thinking 9 approaches to evaluation and 10 types of tests objective and interpretive Individual chapters contain references DB Strategies for Teachers Paul D. Eggen, Donald P. Kauchak, 1988 MODELS AND PARADIGMS FOR TEACHING Practical Strategies for the Teaching of Thinking Barry K. Beyer, 1987 *Teaching for Critical Thinking* Stephen D. Brookfield, 2011-10-18 While notions of what constitutes critical thinking vary educators politicians and employers all agree that critical thinking skills are necessary for well educated citizens and a key capacity for successful employees In *Teaching for Critical Thinking* Stephen Brookfield explores how students learn to think critically and what methods teachers can use to help In his engaging conversational style Brookfield establishes a basic protocol of critical thinking that focuses on students uncovering and checking assumptions exploring alternative perspectives and taking informed actions The book fosters a shared understanding of critical thinking and helps all faculty adapt general principles to specific disciplinary contexts Drawing on thousands of student testimonies the book identifies the teaching methods and approaches that are most successful when teaching students to think read and write critically Brookfield explains when to make critical thinking the classroom focus how to encourage critical discussions and ways to reach skeptical students He outlines the basic components required when reviewing a text critically and shows how to give highly specific feedback The book also addresses how to foster critical thinking across an institution beginning with how it can be explained in syllabi and even integrated into strategic plans and

institutional missions Brookfield stresses the importance of teachers modeling critical thinking and demonstrates himself how to do this Crammed with activities and techniques this how to guide is applicable in face to face online and hybrid classrooms of all sizes Each exercise includes detailed instructions examples from different academic disciplines and guidance for when and how to best use each activity Any reader will come away with a pedagogic tool kit of new ideas for classroom exercises new approaches to designing course assignments and new ways to assess students ability to practice critical analysis
