What's the BIG Idea? Our Sacred Source Andrew Kneier,2021-01-05 Life is not a cakewalk for any of us We each have our individual sufferings and challenges in life and we each must endure vital questions that have no certain answers Why are we here Where is God when we need him How do our lives matter in the long run Our science cannot help us with such questions but theology can And that s what this

book has to offer This book s theology is based on an arresting theory about God Turning to modern physics it finds God in the origin of the universe and in the innermost foundations of the natural world The universe flowed from his nature but his nature was not perfect which is why we have an imperfect world where bad things happen to good people And yet we also find this God deep within us enabling us to confront our suffering with resilience and grace The evil in the world has power but we have power too the power from our inner God to hold steady against the slings and arrows of our misfortunes The theology presented here builds on the discoveries of particle physics and quantum mechanics about the foundational building blocks and forces in all of creation These reveal the abounding spirit and purposes of the Creator a spirit that empowers us and instills in us purposes we can embrace and foster It may seem we are essentially on our own as we navigate through life but in this book s theology God is always and everywhere with us and in us *American Book Publishing Record* ,2003

Faster Than Light C J Harvey,2020-11-17 Author s Note Science history shows many theories to have been presented and initially accepted but had later been found wanting or replaced by a more enlightening theory The earth as the centre of the universe with the sun and other planets revolving around it was widely accepted during the second century A D Since then science has progressed in leaps and bounds until today we talk of parallel universes super strings and wormholes We have the ten dimension theory of the universe which makes possible the merger between the geometry of Einstein s theory and that of the quantum field theory Enormously powerful theorems in mathematics now take on physical significance Physics and mathematics are so intricately interwoven that mathematics leads us in directions we would not normally take if we followed up physical ideas by themselves Calculus was born from a need by Newton to solve the equations for gravity Physics I believe is ultimately based on a small set of physical principles These principles called first principles can usually be expressed in plain English without reference to mathematics From the Copernican theory to Newton s laws of motion and even Einstein s relativity the basic physical first principles require just a few sentences that are largely independent of any mathematics And remarkably only a handful of first principles are sufficient to summarise most of modern physics Nevertheless mathematical equation is still the best way to prove a point Cosmologist and mathematician Stephen Hawking has written eloquently about the need to explain to the widest possible audience the physical picture underlying all of physics If we do discover a complete theory it should in time be understandable by everyone not just a few scientists Then we shall all philosophers scientist and just ordinary people be able to take part in the discussion of the question of why it is that we and the universe exist If we find the answers to that it would be the ultimate triumph of human reason for then we would know the mind of God My Seven Circle Theory has a correlation with the creation account stated in the first chapter of Genesis in the Bible The activity that we see in nature all around us was all progressively created in six cyclic periods out of this dark matter or energy medium Today we live in that sixth cyclic phase Here all physical matter i e protons atoms are in a progressive decay status which gives us a duration measurement factor called Time Time only commenced with the start of

this sixth phase The next phase is the seventh cycle phase and total atom decay will have been completed with physical matter non existent The seventh cycle phase will be one of total inactivity The universe will be dormant and devoid of all matter virtually a period of rest Perhaps the Ancients really knew how our universe was created and that with the passing of time their records seem distorted The overall seven cycles principle however has perpetuated Today Big Bang theorists believe that a mysterious fluid existed at 10¹² seconds from Big Bang and that in the following moments as expansion occurred and temperatures dropped a sudden phase change occurred in this mysterious fluid reminiscent of water freezing to ice Suddenly they believe all the familiar particles protons electrons neutrinos photons quarks etc came into existence Faster than Light is a science theory of invisible Dark Matter and has its relationship with the E in Einstein s formula $E = mc^2$ As such throughout the text I have referred to Dark Matter as that subtle Energy Medium from which all mass is created It is a Grand Unified Theory but without rigorous mathematical treatment Birmingham 2020 C J Harvey [New Science Theory and On The Magnet](#) Vincent Wilmot, William Gilbert, 2015-07-22 The first book is basically the New Science Theory com site as on 1 January 2018 for changes since then visit the website with its Sitemap noting updates It is especially good for those interested in physics theory concentrating chiefly on the four great physicists William Gilbert Rene Descartes Isaac Newton and Albert Einstein and also having fine sections on Galileo Kepler History of Science Gravity Light String Theory Standard Model Physics Probability Science Philosophy of Science and General Image Theory Science The second book is a new improved English translation of William Gilbert s banned Latin 1600 De Magnete or On The Magnet This is rather easier to read than its two earlier translations and significantly helps to clarify Gilbert s attraction physics which Newton put as one of the two mathematized physics options and which he is believed to have privately favoured It is basically a novel signal response or remote control physics that may still have relevance *Science* John Michels (Journalist), 1884 Vols for 1911 13 contain the Proceedings of the Helminothological Society of Washington ISSN 0018 0120 1st 15th meeting *True Mystic Science* ,1938 **Science for High School Students** Harry Messel, 1963 *New Science Theory* Vincent Wilmot, 2011-02 New Science Theory by Vincent Wilmot is basically the New Science Theory com website as on 6 April 2022 for any changes since then visit the site where its Sitemap notes any updates Especially good for those interested in physics and physics history it concentrates chiefly on the four great physicists Albert Einstein Isaac Newton Rene Descartes and William Gilbert Also here are fine sections covering Galileo Kepler Tesla History of Science Philosophy of Science Information Physics Gravity Light Standard Model String Theory Probability Science and General Image Theory **Proceedings of the Royal Society.
