for anyone who wants to stencil combining inspiration with practical information and a wealth of designs to trace from and make into stencils      Handbook of Printed Circuit Manufacturing Raymond H. Clark,2012-12-06 Of all the components that go into electronic equipment the printed circuit probably requires more manufacturing operations each of which must be performed by a skilled person than any other As a shift supervisor early in my printed circuit career I had to hire and train

personnel for all job functions The amount of responsibility delegated to my subordinates depended strictly on how well I had been able to train them Training people can be a trying experience and is always a time consuming one It behooved me to help my workers obtain the highest degree of job understanding and skill that they and I were capable of One hindrance to effective teaching is poor continuity of thought for example having to say to a trainee Wait a minute forget what I just told

you We have to go back and do some thing else first It was in trying to avoid pitfalls such as this that I undertook a detailed examination of the processes involved what I thought each trainee had to know and what questions they would most frequently ask From this analysis I developed the various process procedures Only after I had done so was I able to train effectively and with the confidence that I was doing the best possible job Answers had to be at hand for all of their questions and in what ever detail they needed to know
