Stagecraft Scene Design:

The Art of Stagecraft F. Randy deCelle, 2024-06-28 The Art of Stagecraft Reflections on Design and Creation in Theatre is a thoughtful examination of the intersection of design art and the modern and contemporary theatrical design practitioner Utilizing a recently discovered folio of materials of stagecraft practices that was being compiled by Mobile Alabama artist Edmond Carl deCelle who was nationally known for his sketches paintings murals Mardi Gras pageants and parades and theatre productions along the Gulf Coast in the years 1930 1970 the book examines methodologies of production using sketches from the artist as well as his thoughts on design art and the shifts that were happening in the industry during the time The book looks at a sampling of traditional theatrical design and stagecraft practices that became formalized in the mid 20th century and compares them to contemporary practices offering a reflection on the current state of theatre production stagecraft practices and the theatre practitioner as an artist For those just coming into theatre production The Art of Stagecraft provides a resource for a selection of well proven straightforward techniques that have been developed over many years For those in theatre production the book serves as a guide for an assortment of traditional techniques that are still in use today but may not be known by everyone For all readers this book will also look at a sample of traditional techniques that have been phased out in favor of contemporary methods due to the development of modern materials *Stagecraft and Scene Design* Herbert Philippi, 1953 Scene Design in the American Theatre from 1915 to 1960 Helen N. Larson, Orville Kurth Larson, 1989-01-01 **Practical Stage-craft** Mary Helen Hynes, 1930 **The Making of Theatre History** Paul Kuritz, 1988 **Stagecraft** Trevor R. Griffiths, 1998 This volume is a guide to theatre production including all aspects from choosing and casting a play make up set design suggestions for actors and directors house management administration and publicity The editor introduces stage terminology as well as production roles time lines and responsibilities among many other topics Scene Design: Rendering and Media Wenhai Ma, 2012-03-02 Scene Design Rendering and Media is intended to help students or practitioners improve their skills at making finished renderings of scene designs for theater The book demonstrates the process of creating the renderings through real world methods and techniques Chapters are dedicated to a detailed discussion of various tools including drawing light and shadow color mixing painting figures and other media and the book is rife with colorful and inspirational examples *Developing the Modern Scene Design Process: Cognition and the New Stagecraft* David Bisaha, 2015 This dissertation examines the working processes and professional activities of American scenic designers between 1910 and 1950 Beginning with the assertion that a common idea of design process has persisted among American professionals for much of the century my case studies probe the history of the process Previous historians have noted that the modern scene design process was heavily informed by the New Stagecraft movement and promulgated its aesthetic values simplicity unification collaboration Inspired by European modernist production especially the work of Edward Gordon Craig Adolph Appia and Max Reinhardt New Stagecraft artists produced simplified or abstract settings

unified design concepts and introduced a more collaborative production model This dissertation argues that the New Stagecraft revolution was not only an aesthetic shift but also the beginning of theatrical design as a profession I do so by analyzing ways in which New Stagecraft designers defined and defended their professional status They developed new tools for script analysis and documenting their work published books and articles demonstrating the value of good design and strategically allied themselves with organized labor and major universities They also institutionalized their practices in labor regulations entrance exams and educational curricula The perceived stasis of the design process can be attributed to the preservation of specific design behaviors in these institutions Methodologically I draw on studies of designing based in the cognitive and design sciences Archived remnants of past designers are analyzed through principles of situated and extended cognition such as offloading affordances and artifact use I then develop my conclusions through concepts of professional expertise including reflective practice and practicum education and finally link individual practices to social change by applying the history of professionalization as it has been developed by sociologists In total this dissertation charts a method for applying cognitive studies research to theatrical design history and a way of linking private creative practices to larger changes in theatrical production methods By studying the behavior of influential scenic designers both in the studio and in their professional networks I show how strategically placed individuals processes came to define the field
