Bemis,2012-12-06 The purpose of this book is to provide information for the nephrologist to gain a perspective on the medical scientific and technical aspects of reprocessing of hemodialyzers The book is also designed to serve the needs of the associated medical nursing and technical staffs of dialysis facilities for data on reuse of hemodialyzers As an information source the book will prove to be useful for those who may be considering reprocessing of dialyzers as well as persons who are currently involved in this aspect of the practice of nephrology We have focused on the clinical and technological aspects of hemodialyzer reprocessing and have not dealt with socioeconomic considerations We do wish to share with physicians performing hemodialysis several observations we have made as a result of assembling this volume We believe that hemodialyzer reuse has had a beneficial impact on the quality of care for hemodialysis patients in consideration of the following factors There is an increased awareness of membrane biocompatibility issues that has been brought to the forefront with the application of reuse Utilization of hemodialyzer reprocessing has enabled nephrologists to compare the effect of various measures on biocompatibility when the patient is exposed to either a new or a reprocessed device Previously few readily available comparisons existed In the practice of dialysis water quality has always been of considerable importance With the advent of widespread hemodialyzer reprocessing the issues of water bacteriology and water quality have become more prominent *West Coast Review of Books* ,1977
