Reflexive Governance for Sustainable Development Jan-Peter Voß, Dierk Bauknecht, René Kemp, 2006-01-01 This book deals with the issue of sustainable development in a novel and innovative way. With conceptualising reflexive governance, the book leads a way out of endless quarrels about the definition of sustainability and into a new mode of collective action.

Leadership and Politics Bryan D. Jones, 1989 In twelve essays, influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders, institutions, goals, procedures, problems, and traditions involved. The approaches are as varied as the subject itself, coalescing around the central question of how leaders interact with, transform, or are controlled by the organizations they lead.

Unfair Housing Mara S. Sidney, 2003 It is difficult to ignore the fact that even as the United States becomes much more racially and ethnically diverse, our neighborhoods remain largely segregated. The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end discrimination, yet for millions of Americans, housing options remain far removed from the American Dream. Why do most neighborhoods in American cities continue to be racially divided? The problem suggests Mara Sidney lies with the policies themselves. She contends that to understand why discrimination persists, we need to understand the political challenges faced by advocacy groups who implement them. In Unfair Housing, she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists. Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination, what actions they took, and which political relationships they cultivated. As a result, local governments became less likely to include housing discrimination on their agendas; existing laws went unenforced, and racial segregation continued. A former undercover investigator for a fair housing advocacy group, Sidney takes readers into the neighborhoods of Minneapolis and Denver to show how federal housing policy actually works. She examines how these laws played out in these cities and reveals how they eroded activists' capability to force more sweeping reform in housing policy. Sidney also shows how activist groups can cultivate community resources to overcome these difficulties, looking across levels of government to analyze how national policies interact with local politics. In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case, Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations. Sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation. As battles over fair housing continue, her book helps us understand the shape of the battlefield and the prospects for victory.

Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner, 1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to

posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie s work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom
