Straw In The Wind:

Social Inquiry and Bayesian Inference Tasha Fairfield, Andrew E. Charman, 2022-08-04 Fairfield and Charman provide a modern rigorous and intuitive methodology for case study research to help social scientists and analysts make better inferences from qualitative evidence The book develops concrete guidelines for conducting inference to best explanation given incomplete information no previous exposure to Bayesian analysis or specialized mathematical skills are needed Topics covered include constructing rival hypotheses that are neither too simple nor overly complex assessing the inferential weight of evidence counteracting cognitive biases selecting cases and iterating between theory development data collection and analysis Extensive worked examples apply Bayesian guidelines showcasing both exemplars of intuitive Bayesian reasoning and departures from Bayesian principles in published case studies drawn from process tracing comparative and multimethod research Beyond improving inference and analytic transparency an overarching goal of this book is to revalue qualitative research and place it on more equal footing with respect to quantitative and experimental traditions by illustrating that Bayesianism provides a universally applicable inferential framework

Early American Proverbs and Proverbial Phrases Bartlett Jere Whiting, 1977 p B J Whiting savors proverbial expressions and has devoted much of his lifetime to studying and collecting them no one knows more about British and American proverbs than he The present volume based upon writings in British North America from the earliest settlements to approximately 1820 complements his and Archer Taylor s Dictionary of American Proverbs and Proverbial Phrases 1820 1880 It differs from that work and from other standard collections however in that its sources are primarily not literary but instead workaday writings letters diaries histories travel books political

pamphlets and the like The authors represent a wide cross section of the populace from scholars and statesmen to farmers shopkeepers sailors and hunters Mr Whiting has combed all the obvious sources and hundreds of out of the way publications of local journals and historical societies This body of material because it covers territory that has not been extracted and compiled in a scholarly way before can justly be said to be the most valuable of all those that Whiting has brought together according to Albert B Friedman What makes the work important is Whiting s authority a proverb or proverbial phrase is what BJW thinks is a proverb or proverbial phrase There is no objective operative definition of any value no divining rod his tact feel experience determine what s the real thing and what is spurious
