Wines From Chile:

The Wines of Argentina, Chile and Latin America Christopher Fielden, 2003-02-13 After Europe Latin America is one of the major wine producing areas of the world yet very little has been written about its wines This title follows the transformation of winemaking in these countries examines in detail each of the wine growing areas and explains how these now extremely popular wines were until relatively recently more or less unknown There are details of more than 230 producers from Peru to Cuba with insight into the challenges faced by some of the lesser known countries and regions It also explains the role of other internationally respected wine names such as Torres Mondavi and Rolland

The Wines of Chile Peter Richards, 2006-11-16 Region by region award winning writer Peter Richards takes us through all of Chile's many winemaking areas Starting with the history of Chile and its wine industry the work includes details on the country's diversity of terroirs the range of wine styles available and the variety of winemaking techniques in use plus a topical discussion of recent developments Full details of all the leading producers and their top wines form the core of this book

[Wines of Chile](#) Pierre Dubois, 2020-03-31 The Chilean wine industry is known for its versatility with almost every major type of vino represented While the country produces several varieties of white wine Chile is probably most recognized for its selection of reds In terms of volume cabernet has long served as the country's bestseller but Chile is also known for producing two very different types of syrah made from dark flavourful grapes For years Chile produced large quantities of what was thought to be merlot In the 1990s wine enthusiasts from France spotted the grapes used for this wine in a Chilean vineyard and were able to identify them as carmenere rather than merlot The deep dark purple carmenere grape was once grown throughout France but a devastating insect infestation in the 19th century virtually eliminated these vines Luckily the Spanish had already planted clippings in Chile where they were rediscovered more than a century later Since then carmenere has become Chile's signature wine
