

Steno's laws of stratigraphy

1.

Law of superposition
Younger layers of rock sit atop older layers.

2.

A. Original orientation

B. Orientation after tilting (folding)

Law of original horizontality

Layers of sedimentary rock are originally deposited flat.

3.

Law of cross-cutting relationships
Rock layers A and B must be older than the intrusion (C) that disturbs them.
(Principle later reinforced by James Hutton.)

4.

Law of lateral continuity

Layers of rock are continuous until they encounter other solid bodies that block their deposition or until they are acted upon by agents that appeared after deposition took place.

Stratigraphy Principles Methods

JG Myers

Stratigraphy Principles Methods:

Adopting the Beat of Appearance: An Emotional Symphony within **Stratigraphy Principles Methods**

In a world consumed by monitors and the ceaseless chatter of instantaneous conversation, the melodic beauty and psychological symphony produced by the written term frequently diminish into the background, eclipsed by the persistent noise and disturbances that permeate our lives. But, located within the pages of **Stratigraphy Principles Methods** a charming fictional value brimming with organic emotions, lies an immersive symphony waiting to be embraced. Crafted by an outstanding composer of language, this interesting masterpiece conducts viewers on an emotional journey, well unraveling the hidden melodies and profound affect resonating within each cautiously crafted phrase. Within the depths of the emotional evaluation, we can examine the book's main harmonies, analyze its enthralling publishing fashion, and surrender ourselves to the profound resonance that echoes in the depths of readers' souls.
