The Handbook for the Future of Work Julie MacLeavy, Frederick Harry Pitts,2024-12-26 The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty first century Focusing on the past two decades the handbook explores how technological advancements automation and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations Beyond simply outlining the challenges and opportunities of automation the handbook integrates these emerging realities with established discussions of work Importantly it moves beyond dominant technology centric narratives probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models With contributions from established and emerging authors based in institutions around the world the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities practices and sectors politics and environments The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries A useful resource for students and researchers the handbook serves as an essential guide to this new intellectual landscape

The Nordic future of work: Jon Erik Dølvik, Johan Røed Steen,2018-11-27 The Nordic future of work How will work and working life in the Nordic countries change in the future This is the question to be addressed in the project The Future of Work Opportunities and Challenges for the Nordic Models This initial report describes the main drivers and trends expected to shape the future of work It also reviews the main distinctions of the Nordic model and recent developments in Nordic working lives pointing towards the kind of challenges the future of work may pose to the Nordic models Too often debates about the future narrowly focus on changes in technology This report draws attention to the broader drivers and political institutional frameworks influencing working life developments aiming to spur debate about how the interaction of changes in demography climate globalization and digital technologies may influence Nordic working lives in the coming

decades *The Future of Work Environments* Werner Eichhorst,2025-07-15 Werner Eichhorst examines how work is paradoxical in its very nature both a necessity and a demanding burden and considers what the optimum future of working environments could look like *New Directions in the Future of Work* Mónica Santana,Ramón Valle-Cabrera,2021-11-05 New Directions in the Future of Work explores vital research and industrial issues that are central to understanding the concepts of the Future of Work and address key challenges in this evolving area of debate *Gender, Technology, and the Future of Work* Mariya Brussevich,Ms.Era Dabla-Norris,Christine Kamunge,Pooja Karnane,Salma Khalid,Ms.Kalpana Kochhar,2018-10-09 New technologies digitalization artificial intelligence and machine learning are changing the way work gets done at an unprecedented rate Helping people adapt to a fast changing world of work and ameliorating its deleterious impacts will be the defining challenge of our time What are the gender implications of this changing nature of work How vulnerable are women s jobs to risk of displacement by technology What policies are needed to ensure that technological change supports a closing and not a widening of gender gaps This SDN finds that women on average perform more routine tasks than men across all sectors and occupations tasks that are most prone to automation Given the current state of technology we estimate that 26 million female jobs in 30 countries 28 OECD member countries Cyprus and Singapore are at a high risk of being displaced by technology i e facing higher than 70 percent likelihood of being automated within the next two decades Female workers face a higher risk of automation compared to male workers 11 percent of the female workforce relative to 9 percent of the male workforce albeit with significant heterogeneity across sectors and countries Less well educated and older female workers aged 40 and above as well as those in low skill clerical service and sales positions are disproportionately exposed to automation Extrapolating our results we find that around 180 million female jobs are at high risk of being displaced globally Policies are needed to endow women with required skills close gender gaps in leadership positions bridge digital gender divide as ongoing digital transformation could confer greater flexibility in work benefiting women ease transitions for older and low skilled female workers [Artificial Intelligence and the Future of Work: Humans in Control](#) Ekkehard Ernst,Janine Berg, Phoebe V. Moore,2024-10-01 Artificial Intelligence AI is rapidly advancing in areas such as pattern detection classification and prediction which were long thought to be the exclusive realm of humans These developments are triggering excitement about the potential of AI but are also raising concerns about possible risks The versatility of AI and its speed of development have led to a wide range of applications both in personal and professional environments The most dramatic effects are however in the world of work AI is impacting job loss and employability and causing a transformation of tasks in a range of occupations and sectors It is also affecting other aspects of the labor market such as recruitment performance monitoring and dismissal As such the development and implementation of AI are raising concerns about the future of work both in terms of its mere existence and quality with critical implications for the social fabric as well as future development prospects *The Future of Work in the United States* Natalie Rauscher,2021-09-03

This book presents and analyzes how restructuring processes due to technological change are reflected and processed in political and public discourses in the United States in the most recent past More specifically this work examines how the themes of automation digitization and the platform economy and their impact on the future of work are reflected in public discourse through the analysis of journalistic articles and political discourse through the analysis of congressional hearings Public and political discourses as well as economic narratives shape our understanding of certain developments such as technological change our behavior more generally and societal support of said developments Therefore it is vital to investigate and analyze these discourses in order to show how technological change is perceived and evaluated today This work draws from concepts and methods of several different disciplines most notably using a combination of corpus linguistic methods and exemplary textual analysis This way this work stands as truly interdisciplinary with a unique approach to the quantitative and qualitative examination of discourses
