The handbook provides valuable advice and guidance on how to get projects finished on time within budget and to the complete satisfaction of users whether a high tech low tech financial manufacturing or service organization. Project Management Handbook brings together contributions from an all star team of more than 40 of experts working at leading enterprise organizations and consulting firms across America and around the world. With the help of dozens of fascinating and instructive case studies and vignettes reporting experiences in a wide range of business sectors those experts share their insights and experience and extrapolate practicable guidelines and actions steps that project managers can put to work on their current projects. **Practice of Project Management**

Enzo Frigenti, Dennis Comminos, 2005-12-03 Traditional project management has tended to focus primarily on the processes of managing projects to successful completion. To manage projects from their inception through to actual delivery of the business enabling objectives a different project management approach is needed. Project management needs to become part of the business. This book addresses the concepts and issues of business project management. It aims to assist organisations in making the shift from a narrow strong technical focus on project management to a broader more business oriented focus. The Practice of Project Management introduces three basic concepts which underpin the philosophy of the business oriented approach: Business Focused Project Management (BFPM) which takes an organisation wide view, The Wrappers Model and Objective Directed Project Management (ODPM) both of which provide the philosophies, processes, concepts and tools used to enable BFPM. *Project Management Software Survey* Project Management Institute, 1999 Offers an efficient way to compare and contrast the capabilities of a wide variety of project management tools. More than two hundred software tools are listed with comprehensive information on system features, how they perform, time analysis, resource analysis, cost analysis, performance analysis, cost reporting and how they handle multiple projects, project tracking, charting and much more.
