## **Stoic Studies:**

*Stoic Studies* A. A. Long, 1996-07-26 For the past three decades A A Long has been at the forefront of research in Hellenistic philosophy In this book he assembles a dozen articles on Stoicism previously published in journals and conference proceedings The collection is biased in favour of Professor Long s more recent studies of Stoicism and is focused on three themes the Stoics interpretation of their intellectual tradition their ethics and their psychology The contents of the book reflect the peculiarly holistic and systematic features of Stoicism The papers are printed here in their original form for the most part but the author has made some minor corrections and stylistic or bibliographical changes He has also added a postscript to three papers whose topics have been the subject of much discussion during the years since they first appeared

Studies in Stoicism P. A. Brunt, Michael Crawford, 2013-03-28 This important volume fulfills one of Peter Brunt s 1917 2005 last wishes a collection of his most important papers in the area of scholarship that had occupied him in his earliest years of research and which largely absorbed his attention after his retirement from the Camden Chair of Roman History at Oxford University in 1982 Brunt was interested primarily in Stoicism in the Roman period and his chief concern was the practical influence of its ethical teaching on political and social life Although his investigations were historical they required a complete mastery of the Stoic texts and doctrine Basing his work almost entirely on the ancient sources Brunt provides the most complete account and comparison available today not only of the ideas of the Roman Stoic moralists but also of the political philosophy of the Greek founders of the Stoa He believed that the ideas of the Stoics of the Roman period were essentially continuous with the thinking of the founders and he did not accept that the concern with practical everyday morality in later Stoicism was a new development *Studies in Stoicism* contains six unpublished and seven republished essays the latter incorporating additions and changes which Brunt wished to be made The papers have been integrated and arranged in roughly chronological order and by subject matter with an accessible lecture to the Oxford Philological Society serving as Brunt s own introduction

*Stoicism* John Sellars, 2014-12-05 This is the first introduction to Stoic philosophy for 30 years Aimed at readers new to Stoicism and to ancient philosophy it outlines the central philosophical ideas of Stoicism and introduces the reader to the different ancient authors and sources that they will encounter when exploring Stoicism The range of sources that are drawn upon in the reconstruction of Stoic philosophy can be bewildering for the beginner Sellars guides the reader through the surviving works of the late Stoic authors Seneca and Epictetus and the fragments relating to the early Stoics found in authors such as Plutarch and Stobaeus The opening chapter offers an introduction to the ancient Stoics their works and other ancient authors who report material about ancient Stoic philosophy The second chapter considers how the Stoics themselves conceived philosophy and how they structured their own philosophical system Chapters 3 5 offer accounts of Stoic philosophical doctrines arranged according to the Stoic division of philosophical discourse into three parts logic physics and ethics The final chapter considers the later impact of Stoicism on Western philosophy At the

end of the volume there is a detailed guide to further reading [God and Cosmos in Stoicism](#) Ricardo Salles,2009-09-24  
 Nine new essays examine the close connection between theology and cosmology in Stoic philosophy The contributors discuss the nature of god his relation to the material world fate and causation rival cosmologies and the ethical and religious consequences of the Stoic theories of god and cosmos **A New Stoicism** Lawrence C. Becker,2017-08-29 What would stoic ethics be like today if stoicism had survived as a systematic approach to ethical theory if it had coped successfully with the challenges of modern philosophy and experimental science A New Stoicism proposes an answer to that question offered from within the stoic tradition but without the metaphysical and psychological assumptions that modern philosophy and science have abandoned Lawrence Becker argues that a secular version of the stoic ethical project based on contemporary cosmology and developmental psychology provides the basis for a sophisticated form of ethical naturalism in which virtually all the hard doctrines of the ancient Stoics can be clearly restated and defended Becker argues in keeping with the ancients that virtue is one thing not many that it and not happiness is the proper end of all activity that it alone is good all other things being merely rank ordered relative to each other for the sake of the good and that virtue is sufficient for happiness Moreover he rejects the popular caricature of the stoic as a grave figure emotionally detached and capable mainly of endurance resignation and coping with pain To the contrary he holds that while stoic sages are able to endure the extremes of human suffering they do not have to sacrifice joy to have that ability and he seeks to turn our attention from the familiar therapeutic part of stoic moral training to a reconsideration of its theoretical foundations **The Art of Living** John Sellars,2018-01-18 This title was first published in 2003 Presenting philosophy as an art concerned with one's way of life Sellars draws on Socratic and Stoic philosophical resources and argues for the ancient claim that philosophy is primarily expressed in one's behaviour The book considers the relationship between philosophy and biography and the bearing that this relationship has on debates concerning the nature and function of philosophy Questioning the premise that philosophy can only be conceived as a rational discourse Sellars presents it instead as an art techne that combines both logos rational discourse and askesis training and suggests that this will make it possible to understand better the relationship between philosophy and biography The first part of this book outlines the Socratic conception of philosophy as an art and the Stoic development of this idea into an art of living as well as considering some of the ancient objections to the Stoic conception Part Two goes on to examine the relationship between philosophical discourse and exercises in Stoic philosophy Taking the literary form of such exercises as central the author analyses two texts devoted to philosophical exercises by Epictetus and Marcus Aurelius **Smith College Classical Studies** Smith College,1920 **The Year's Work in Classical Studies ...** Classical Association (Great Britain),1913 **The Year's Work in Classical Studies** ,1913 *The Journal of Hellenic Studies* ,1907 Vols 1 8 1880 87 plates published separately and numbered I LXXXIII **Studies in Philology** ,1921 **Cornell Studies in Classical Philology** ,1899 **Studies in Language and Literature** University of Wisconsin,1918 *Speculative Grammar and*
