Journalism Rachel Matthews,Guy Hodgson,2023-07-13 Local Journalism investigates the range of meanings associated with
the local newspaper and considers how digital technology has disrupted the fabric of the local news industry Divided into two
parts this book first provides a theoretical account of how normative meanings associated with the local newspaper have
been challenged by the impact of digital technology and then goes on to explore these questions via case studies drawn from
a variety of contexts including the US Ireland Denmark the UK and Spain It suggests three thematic ways of understanding
the role of the legacy local newspaper in a post digital environment namely as an information provider commercial entity and
community champion While much scholarship talks of their demise this book argues for a more nuanced understanding of the
local newspaper and its continued significance to people places and commercial interests Local Journalism will benefit

news coverage on international affairs since television news began especially in relation to the coverage of massive human rights violations These debates have only intensified in the last 20 years as new technologies have changed the nature of news and the news cycle But despite frequent assertion little research into the CNN Effect or whether television coverage of human rights violations causes state action exists Bridging across the disciplines of human right studies comparative politics and communication studies in a way that has not been done this book looks at television news coverage of human rights in the US and UK to answer the question of whether the CNN Effect actually exists Examining the human rights content in television news in the US and UK yields insights to what television news producers and policy makers consider to be human rights and what if anything audiences can learn about human rights from watching television news After reviewing 20 years of footage using three different types of content analyses of American television news broadcasts and two different types of British news broadcasts and comparing those results with human rights rankings and print news coverage of human rights Shawns M Brandle concludes that despite rhetoric from both countries in support of human rights there is not enough coverage of human rights in either country to argue that television media can spur state action on human rights issues More simply the violations will not be televised A welcome and timely book presenting an important examination of human rights coverage on television news
