Storm Chasers Chinedu Nnadi, 2025-09-30 A decade ago Alex Rivera and Maya Chen were the Gulf's boldest storm chasing duo and each other's great love until a disastrous night shattered their partnership. Now a monster hurricane called Kestrel is sprinting toward the coast fattened by record warm seas and aimed at millions who still sleep through the sirens. When Maya discovers the official numbers don't add up, cooler seas, lower surge, safer forecasts, she suspects sabotage. Hours later their mentor dies in a single car accident leaving behind a drive of raw data and a warning: trust only what you can touch. Forced back into the same truck they once called home, Alex and Maya plunge into walls of rain, lightning-lit sugarcane and buckling bridges to ground truth the storm. Each mile peels back old wounds and the wildfire chemistry they swore to bury. What they uncover is a billion-dollar scheme, a corporate giant tampering with ocean buoys and weather feeds to keep ports open, profits high, and evacuations late. When their livestream is jammed and a corrupt deputy impounds their rig, the chase becomes a rescue mission. With power grids collapsing and surge rising like a black tide, they commandeer a volunteer's skiff, mount a rooftop antenna, and race the eyewall to broadcast a real warning before entire neighborhoods drown. To stop the lie, they must survive the truth of the storm, the conspiracy, and the love they left in the wreckage. Heart-pounding and deeply human, *Storm Chasers* is a thriller about second chances, the cost of silence, and choosing justice when every second counts.

International Documentary, 2004 **Tornado Hunter** Stefan Bechtel, Tim Samaras, 2009 METEOROLOGY With climate change and global warming creating more frequent and more violent storms, there is a huge readership for weather disasters such as hurricanes and tornadoes. This book will appeal to the audience for the bestseller *Perfect Storm*. This page-turning story of tornado chaser and National Geographic grantee Tim Samaras opens with a chilling play-by-play description of the F5 tornado that wiped off the map the town of Manchester, North Dakota, on June 24, 2003. Stefan Bechtel, author of the acclaimed *Roar of the Heavens*, teams with Samaras to reveal the heart and people of the town, the terror of the descending funnel, Samaras' fearless chase to the tornado's core, and the ingenious equipment he masterminded to record the inner workings of a tornado to aid in future detection, avoidance, and destruction.
