Ultimo Mundo El:

Pero un pequeño y gracioso personaje quizá pueda devolverle la fe. Marinus Anthony van der Sluijs, 2018-01-01. This work in 6 volumes is a compendium of traditional cosmologies worldwide. The material includes the global mythology of creation and destruction but also comprises information drawn from other areas of traditional knowledge: ritual iconography, shamanism, costume and dance. Relying on original sources, universal points of agreement are identified, often on counter-intuitive ideas. These suggest a single template, a blueprint for a universal mythology of origins with local variations. Volume 5 documents a large number of traditions concerning unusual and often undesirable properties and activities of the sun and moon. To name just a few examples, prominent beliefs were that the moon was originally brighter than the sun and that the earth once succumbed to the heat caused by the sun's former proximity; its greater strength; its failure to move; or the appearance of multiple luminaries.
