Under Fragile Stone:

Under Fragile Stone Oisín McGann, 2012-11-15 Volume II of The Archisan Tales Taya and Lorkrin's shape-changing Myunan tribe faces an invasion by Noran which is intent on mining the valuable iron ore from their sacred mountain Absaleth. But the mountain is haunted and fights back with supernatural powers. Then a mine tunnel collapses and the miners are trapped. With them are Taya and Lorkrin's parents Nayalla and Mirkrin who had been searching for their unruly children. Taya and Lorkrin are terrified for their parents. But help arrives in the form of their Uncle Emos. He and his friend Draegar know there is one chance for the trapped people: another entrance to the caves far back in the mountain range. A rescue party sets out as the mountain starts to collapse in on itself. *Architect and Engineer*, 1922 **The Inter-Galactic Playground** Farah Mendlesohn, 2009-07-15 Science fiction is often considered the genre of ideas and imagination which would seem to make it ideal for juveniles and young adults; however, the ideas are often dispensed by adults. This book considers the development of science fiction for children and teens between 1950 and 2010, exploring why it differs from science fiction aimed at adults. In a broader sense, this critical examination of 400 texts sheds light on changing attitudes toward children and teenagers toward science education and toward the authors' expectations and sociological views of their audience. *Architect and Engineer of California*, 1922 *A History of Northumberland. Issued Under the Direction of the Northumberland County History Committee* Northumberland county history committee, 1899 *Transactions North of England Institute of Mining and Mechanical Engineers*, 1892 Vols 19 and 22 contain a Catalogue of institute library separately paged **Fortune**, 1930 *The Four Books on Architecture* Andrea Palladio, 2002-08-23 The Renaissance architect Andrea Palladio was one of the most influential figures that the field of architecture has ever produced. For classical architects, the term Palladian stands for a vocabulary of architectural forms embodying perfection and beauty. Of even greater significance than Palladio's buildings is his treatise *I quattro libri dell'architettura*. *The Four Books On Architecture* the most successful architectural treatise of the Renaissance and one of the two or three most important books in the literature of architecture. First published in Italian in 1570, it has been translated into every major Western language. This is the first English translation of Palladio in over 250 years, making it the only translation available in modern English. Until now, English language readers have had to rely mostly on a facsimile of Isaac Ware's 1738 translation and the eighteenth-century engravings prepared for that text. This new translation by Robert Tavernor and Richard Schofield contains Palladio's original woodcuts reproduced in facsimile and positioned correctly adjacent to the text. The book also contains a glossary that explains technical terms in their original context, a bibliography of recent Palladio research, and an introduction to Palladio and his times. The First Book discusses building materials and techniques, as well as the five orders of architecture: Tuscan, Doric, Ionic, Corinthian, and Composite. Palladio describes the characteristics of each order and illustrates them. The Second Book discusses private town houses and country estates, almost all designed by Palladio. The Third Book discusses streets.

Lasers in Urology Thomas A. McNicholas,2012-12-06 The use of lasers in clinical practice is increasing rapidly both in the definitive treatment of disease and in the palliation of symptoms Consequently this sixth contribution to the Bloomsbury Series in Clinical Science is particularly timely It opens with an introduction to the basic physics of lasers and then focuses on the current use of lasers in urological practice and concludes by reflecting on their potential for the future Edited and with several contributions by Tom McNicholas the book also contains contributions from a number of workers at the National Medical Laser Centre in University College Hospital London Given their ever widening application there can be little doubt that lasers will be a subject the series will return to again To date the series has been concerned with a wide range of topics of fundamental importance in clinical science It has now gained momentum and future titles continue to reflect its wide sphere of interest As Series Editor I would welcome suggestions from readers of topics and issues that could usefully be addressed in the series
