performance Green Building Management and Smart Automation Solanki, Arun, Nayyar, Anand, 2019-07-05 Throughout the world there is an increasing demand on diminishing natural resources in the industrial transport commercial and residential sectors Of these the residential sector uses the most energy on such needs as lighting water heating air conditioning space heating and refrigeration This sector alone consumes one third of the total primary energy resources available By using green building and smart automation techniques this demand for energy resources can be lowered Green Building Management and Smart Automation is an essential scholarly publication that provides an in depth analysis of design technologies for green building and highlights the smart automation technologies that help in energy conservation along with various performance metrics that are necessary to facilitate a building to be known as a Green Smart Building Featuring a range of topics such as environmental quality energy management and big data analytics this book is ideal for researchers engineers policymakers government officials architects and students *The World's Greenest Buildings* Jerry Yudelson, 2013-01-17 The World's Greenest Buildings tackles an audacious task Among the thousands of green buildings out there which are the best and how do we know Authors Jerry Yudelson and Ulf Meyer examined hundreds of the highest rated large green buildings from around the world and asked their owners to supply one simple thing actual performance data to demonstrate their claims to sustainable operations This pivotal book presents an overview of the rating systems and shows best in class building performance in North America Europe the Middle East India China Australia and the Asia Pacific region practical examples of best practices for greening both new and existing buildings a practical reference for how green buildings actually perform at the highest level one that takes you step by step through many different design solutions a wealth of exemplary case studies of successful green building projects using actual performance data from which to learn interviews with architects engineers building owners and developers and industry experts to provide added insight into the greening process This guide uncovers some of the pitfalls that lie ahead for sustainable design and points the way toward much faster progress in the decade ahead **The Decarbonization Imperative** Michael Lenox, Rebecca Duff, 2021-10-19 Time is of the essence Climate change looms as a malignant force that will reshape our economy and society for generations to come If we are going to avoid the worst effects of climate change we are going to need to effectively decarbonize the global economy by 2050 This doesn't mean a modest or even a drastic improvement in fuel efficiency standards for automobiles It means 100 percent of the cars on the road being battery powered or powered by some other non carbon emitting powertrain It means 100 percent of our global electricity needs being met by renewables and other non carbon emitting sources such as nuclear power It means electrifying the global industrials sector and replacing carbon intensive chemical processes with green alternatives eliminating scope one emissions emissions in production across all industries particularly steel cement petrochemicals which are the backbone of the global economy It means sustainable farming while still feeding a growing global population Responding to the existential threat of climate change Michael Lenox and Rebecca

Duff propose a radical reconfiguration of the industries contributing the most and most harmfully to this planetary crisis Disruptive innovation and a particular calibration of industry dynamics will be key to this change The authors analyze precisely what this might look like for specific sectors of the world economy ranging from agriculture to industrials and building energy and transportation and examine the possible challenges and obstacles to introducing a paradigm shift in each one With regards to existent business practices and products how much and what kind of transformation can be achieved The authors assert that markets are critical to achieving the needed change and that they operate within a larger scale of institutional rules and norms Lenox and Duff conclude with an analysis of policy interventions and strategies that could move us toward clean tech and decarbonization by 2050
