Under A Stone Small Worlds:

The Small Worlds of Childhood Lauren Shizuko Stone,2025-05-06 The Small Worlds of Childhood argues that prose representations of bourgeois childhood contain surprising opportunities to reflect on the temporality of experience In their narratives of children at home in their everyday worlds Adalbert Stifter Rainer Maria Rilke and Walter Benjamin are not only able to shed a unique light on key issues in the history of philosophy They also offer a queer critique of the normative expectation that the literature of childhood is oriented toward the future Stone shows that when writers engage in philosophical storytelling showing children tarrying in quotidian experience they dislodge childhood from its nostalgic value to grown ups and the heteronormative demand to grow up Such stories of children as philosophical subjects thus take on their own lingering backwards or all together strange sense of time Stone demonstrates the necessity of recognizing how texts on childhood before and beyond Freud engage literary language in the service of a variety of philosophical attitudes reminding us how poetic techniques can tell us something extraordinary about moments of ordinary experience and the manner with which humans and especially children cognize the world By bringing canonical German language literary and philosophical traditions into conversation with current English language queer approaches Stone opens a queer counter history of German and Austrian realist and modernist literature This title is available from the publisher on an open access basis

Architecture of Resistance Yara Sharif,2017-05-08 Architecture of Resistance investigates the relationship between architecture politics and power and how these factors interplay in light of the Palestinian Israeli conflict It takes Palestine as the key ground of spatial exploration looking at the spaces between people boundary lines documents and maps in a search for the meaning of architecture of resistance Stemming from the need for an alternative discourse that can nourish the Palestinian spaces of imagination the author reinterprets the land from a new perspective by stripping it of the dominant power of lines to expose the hidden dynamic topography born out of everyday Palestine It applies a hybrid approach of research through design and visual documentary through text illustrations mapping techniques and collages to capture the absent local narrative as an essential component of spatial investigation
