Soviet Problem In American German Relations:

The Soviet Problem in American-German Relations Uwe Nerlich, James A. Thomson, 1985 **East-west Conflict** Michael D. Intriligator, 2019-04-09 This book aims to bring together American and West German scholars in order to analyze U S German and Soviet elite perceptions of East West conflict It attempts to assess the policy implications and political options for the West **The American Bibliography of Slavic and East European Studies**, 1991 United States Technology Export Control Douglas E. McDaniel, 1993-03-17 This is a broad ranging study of U S strategic export control policy In particular this book analyzes and evaluates the effectiveness of export controls in delaying the acquisition of militarily sensitive high technology by the Soviet Union and its allied states Furthermore the question of whether or not U S economic competitiveness in various high technology sectors has been unduly undermined by export controls is also evaluated Numerous official government studies and reports supplemented by a host of interviews with government officials businesspeople and analysts in the United States and Europe are utilized in drawing conclusions and posting policy recommendations The consequences for export control policy of the revolutionary political upheavals in Eastern Europe and the former U S S R are also addressed The study concludes that the strategic security goal of utilizing controls to hinder and delay the acquisition of militarily significant high technology by the former Soviet Union and its allied states was generally effective More controversially McDaniel argues that export controls per se have not been a significant determinant of lagging U S competitiveness in high technology However this conclusion is qualified by the observation that while overall trends in U S high technology exports to important trading partners do not suggest that controls by themselves have unduly hurt U S exporters individual sectors and small firms may be disadvantaged Finally the study cautions that U S policy must adapt or risk becoming outmoded and increasingly ineffective This book will be of interest to scholars and students of international relations international political economy and international business *The United States in Relation to the European Situation* American Academy of Political and Social Science, 1926 **Emerging Dimensions of European Security Policy** Wolfgang F. Danspeckgruber, 2019-04-08 This book represents an overview of European security affairs as of 1989 1990 It deals with fundamental theoretical and political strategic considerations looks at arms control developments and examines European defense economies and military industrial capabilities of U S **America's Security in the 1980s** Christoph Bertram, 1982-06-18 **Some Outstanding Problems of American Foreign Policy** American Academy of Political and Social Science, 1927 **The Annals of the American Academy of Political and Social Science**, 1916 The Future of Germany and the Atlantic Alliance (Aei Studies) Constantine C. Menges, 1991-09-04 Acknowledging that a united Germany will dominate the new world order evolving in Eastern Europe Menges proposes two alternative political directions for Germany Drawing on his years of observation of the German people and politics he addresses the long term implications of Germany s commitment to the NATO alliance and speculates on what the role of a neutral Germany might be especially

regarding Germany's relationship with the Soviet Union He analyzes the democratic transition in Eastern Europe and also provides a capsule history of the postwar political situation in Germany ISBN 0 8447 3731 3 24 95 **The Crisis in NATO.** United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Europe, 1966 **Annals of the American Academy of Political and Social Science**, 1926 *Rising Titans, Falling Giants* Joshua R. Itzkowitz Shiffrinson, 2018-09-15 As a rising great power flexes its muscles on the political military scene it must examine how to manage its relationships with states suffering from decline and it has to do so in a careful and strategic manner In *Rising Titans Falling Giants* Joshua R Itzkowitz Shiffrinson focuses on the policies that rising states adopt toward their declining competitors in response to declining states policies and what that means for the relationship between the two *Rising Titans Falling Giants* integrates disparate approaches to realism into a single theoretical framework provides new insight into the sources of cooperation and competition in international relations and offers a new empirical treatment of great power politics at the start and end of the Cold War Shiffrinson challenges the existing historical interpretations of diplomatic history particularly in terms of the United States China relationship Whereas many analysts argue that these two nations are on a collision course Shiffrinson declares instead that rising states often avoid antagonizing those in decline and highlights episodes that suggest the US China relationship may prove to be far less conflict prone than we might expect **Areas of Challenge for Soviet Foreign Policy in the 1980s** Gerrit W. Gong, Angela Stent, Rebecca V. Strobe, 1984 **Major Problems in American Foreign Policy: Since 1914** Thomas G. V. Paul, Deborah Welch Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In
