Spaces of Chillida Eduardo Chillida, Gabriel Celaya, 1974 **Spaces of Chillida Espacios** Outlet, Outlet Book Company Staff, Random House Value Publishing Staff, Rh Value Publishing, 1980-01-09 **Chillida--questions and Space** Eduardo Chillida, 1986 **Chillida. Ediz. italiana e inglese** Matthias Bärmann, Eduardo Chillida, 1999 Basque abstract sculptor Eduardo Chillida b 1924 has been recognized with numerous international awards and his works can be found in great museums public spaces and private collections all over the world Chillida Eduardo Chillida, 1985 Chillida Eduardo Chillida, J. M. Tasende, 1986* **The Architecture of the Playing Field** Richard L. Cleary, 2025-05-06 A novel exploration of playing fields as aesthetic and architectural spaces that frame athletes creativity and spectators evolving experiences of sport The playing field is more than an arena for sporting rivalry It is a laboratory of invention where athletes and coaches create new uses for the human body in response to the constraints and affordances of space Indeed Richard Cleary argues that from translucent squash courts to the NBA three point line to the city streets used by skateboarders all sports have embedded spatial relationships that are also charged with social significance The Architecture of the Playing Field explores the aesthetic and physical experiences of the grounds on which we compete Cleary digs into the perspectives of spectators athletes coaches and umpires perspectives that have changed along with the shifting configuration and mediation of the field from early live sports coverage to today s TV broadcasts overlaid with high tech graphics and observed from every angle Cleary shows how rules governing the size shape and divisions of the field reflect sports entwinement with societies at large in particular the politics of race and gender Mindful as well that some sports resist containment he analyzes the disruptive use of space by snowboarders and parkour athletes The Architecture of the Playing Field sensitizes us to the interplay of settings and bodies in motion fundamental to the power of sport *The Place of Silence* Mark Dorrian, Christos Kakalis, 2020-02-06 The Place of Silence explores the poetics and politics of silence in architecture Bringing together contributions by internationally recognized scholars in architecture and the humanities it explores the diverse practices affects politics and cultural meanings of silence silent places and silent buildings in historical and contemporary contexts What counts as silence in specific situations is highly relative and the term itself carries complex and varied significations which make it a revealing field of study Chapters explore a range of themes from the apparent loss of silence in the contemporary urban world through designed silent spaces to the forced silences of oppression catastrophe or technological breakdown The book unfolds a rich and complementary array of perspectives which address through the lens of architecture and place questions of sound atmosphere and attunement together building a volume which will form the key scholarly resource on architecture and silence *Chillida* Eduardo (Chillida Juantegui) Chillida, 1985 *The Sculpted Ear* Ryan McCormack, 2020-04-17 Sound and statuary have had a complicated relationship in Western aesthetic thought since antiquity Taking as its focus the sounding statue a type of anthropocentric statue that invites the viewer to imagine sounds the statue

might make The Sculpted Ear rethinks this relationship in light of discourses on aurality emerging within the field of sound studies Ryan McCormack argues that the sounding statue is best thought of not as an aesthetic object but as an event heard by people and subsequently conceptualized into being through acts of writing and performance Constructing a history in which hearing plays an integral role in ideas about anthropocentric statuary McCormack begins with the ancient sculpture of Laocoön before moving to a discussion of the early modern automaton known as Tipu's Tiger and the statue of the Commendatore in Mozart's Don Giovanni Finally he examines statues of people from the present and the past including the singer Josephine Baker the violinist Aleksandar Nikolov and the actor Bob Newhart with each case touching on some of the issues that have historically plagued the aesthetic viability of the sounding statue McCormack convincingly demonstrates how sounding statues have served as important precursors and continuing contributors to modern ideas about the ontology of sound technologies of sound reproduction and performance practices blurring traditional divides between music sculpture and the other arts A compelling narrative that illuminates the stories of individual sculptural objects and the audiences that hear them this book will appeal to anyone interested in the connections between aurality and statues in the Western world in particular scholars and students of sound studies and sensory history

Curating Consciousness Marcia Brennan, 2010 In Curating Consciousness Marcia Brennan focuses on one of the transformational figures of 20th century curatorial culture and the main protagonist of this until now unacknowledged curatorial practice [Aesthetics After Metaphysics](#) Miguel Beistegui, 2012-08-21 This book focuses on a dimension of art which the philosophical tradition from Plato to Hegel and even Adorno has consistently overlooked such was its commitment explicit or implicit to mimesis and the metaphysics of truth it presupposes De Beistegui refers to this dimension which unfolds outside the space that stretches between the sensible and the supersensible the space of metaphysics itself as the hypersensible and show how the operation of art to which it corresponds is best described as metaphorical The movement of the book then is from the classical or metaphysical aesthetics of mimesis Part One to the aesthetics of the hypersensible and metaphor Part Two Against much of the history of aesthetics and the metaphysical discourse on art he argues that the philosophical value of art doesn't consist in its ability to bridge the space between the sensible and the supersensible or the image and the Idea and reveal the sensible as proto-conceptual but to open up a different sense of the sensible His aim then is to shift the place and role that philosophy attributes to art
