Spatial Sector Programming Models in Agriculture Earl O. Heady, Uma K. Srivastava, 1975-01-01 **Commodity Models for Forecasting and Policy Analysis** Walter C. Labys, Peter K. Pollak, 2024-02-01 Originally published in 1984 this book remains as relevant as when it was first published At that time the oil crises of the 1970s and the growing international debt burden highlighted the extent to which events in primary commodity markets continue to influence the economies of developing and industrialized economies alike Commodity modelling has become a valuable tool in efforts to predict and understand the behaviour of commodity markets and thereby reduce their fluctuations This book provides an overview of the nature of the different types of commodity model as well as their diverse applications In non technical language the reader is introduced to the underlying modelling methodologies including their advantages limitations and commodity specific implications The book will be of interest to commodity economists traders and analysts economic planners and those involved in agricultural mineral and energy modelling **Econometric Decision Models** J. Gruber, 2012-12-06 An Econometric-programming Model for Agricultural Policy Analysis Wen-Yuan Huang, Reuben N. Weisz, Reuben Nathan Weisz, Earl Orel Heady, 1980 Quantitative Planning and Control Yuji Ijiri, Andrew B. Whinston, 2014-06-28 Quantitative Planning and Control Essays in Honor of William Wager Cooper on the Occasion of His 65th Birthday features a collection of papers prepared by students and associates of William Wager Cooper to honor him on the occasion of his sixty fifth birthday The book centers on the theme of Quantitative Planning and Control the theme to which much of Professor Cooper s research effort has been devoted The theme covers diverse fields of inquiry as reflected in the articles in this book which are organized in four parts 1 mathematical programming and decision models 2 economic development and firm growth 3 manpower planning and design and 4 accounting and control At the core of all of the articles in this book lies a belief that analytical approaches can help solve all managerial problems a philosophy that is deeply rooted in Professor Cooper s thinking This book demonstrates how this fundamental view on management can be reflected in dealing with problems in various fields of management In particular the book focuses on three main areas of application of this view economic development manpower planning and accounting and control along with the subject of developing tools that are necessary for solving managerial problems analytically **Stratospheric Ozone Reduction, Solar Ultraviolet Radiation and Plant Life** Robert C. Worrest, Martyn M. Caldwell, 2013-06-29 Inadvertent alterations of the earth s atmosphere by man s activities are now of regional and even global proportion Increasing concern has been focused in the last decade on consequences of acid rain carbon dioxide enrichment of the atmosphere and reduction of ozone in the upper atmosphere The latter two problems are of truly global scale This book focuses on the atmospheric ozone reduction problem and the potential consequences for plant life unlike carbon dioxide enrichment reduction of the total atmospheric ozone column has not yet taken place to a noticeable degree it is a problem of the future The processes leading to ozone reduction involve time periods

on the scale of decades However by the same token if society finds ozone reduction to be unacceptable it will take even longer for the process to be reversed Thus anticipation of the consequences of ozone reduction is of obvious importance Speculation of the possibility of ozone reduction first appeared in the early 1970 s and was focused on the consequences of the injection of large quantities of nitrogen oxides into the upper atmosphere by supersonic aircraft flying at high altitudes Other sources of nitrogen oxides originating from the earth s surface were also considered With further refinement the concerns of nitrogen oxide pollution of the upper atmosphere were diminished since the quantities likely to be involved were insufficient to cause a serious threat to the ozone layer

Assessment of Crop Loss From Air Pollutants W.W. Heck,O.C. Taylor,Tingey,2012-12-06

During late 1985 the Research Management Committee RMC of the National Crop Loss Assessment Network NCLAN decided the most appropriate way to bring the NCLAN program to a successful conclusion was to hold an international conference It was envisaged as an opportunity to present an overview of results from the NCLAN program and as a chance to view the results in the context of ongoing research by members of the international community Although we wanted the Conference to have an assessment orientation it was also intended for the Conference to focus on current state of knowledge The Conference was designed to overview the needs of crop loss assessment current approaches to assessment progress in the development of predictive models the use of the information for economic predictions and the application of the data in policy decisions Every effort was made to assure a broad representation of ideas The Conference program was developed to evaluate major issues that address regional national assessments of impacts of atmospheric pollutants on agricultural production Sessions were structured to address specific issues by invited speakers and by contributed papers and posters First background needs for doing loss assessment research including specific approaches and a rather detailed review of the NCLAN program were addressed Session I Session II addressed the needs for defining the exposure environment e g extrapolating to regional concentrations and exposure characterization Field approaches for determining crop loss were reviewed in Session III
