subject in the context of scientific knowledge objectivity historicity meaning and nature of social reality social and literary theory scientific methodology and fact value dichotomy human and collective agency and the limits to relativism Examining each in turn it argues that the social world is constructed through human actions and becomes significant because we ascribe meaning to it This is organized around discussions on the meaning agency and the making of a social world The book will be useful to scholars and researchers of philosophy of social science political philosophy and sociology Final Moral Values in Sociology ...
