Geographical Information and Planning John Stillwell, Stan Geertman, Stan
Openshaw, 2013-03-09 The 1990s have seen some remarkable changes in geographical information GI provision and
computer technology that have impacted on many of the activities that constitute planning in all its different forms However
relatively few texts in the field of geographical information systems GIS and planning have been published since Henk
Scholten and John Stillwell edited Geographical Information Systems for Urban and Regional Planning in 1990 This volume
seeks to redress the balance by showing how GI of various types is being used in urban physical environmental socio
economic and business planning contexts at local regional and national scales with the assistance of GIS and modelling
methods and how the uses of GI and GI technologies have evolved over the last decade During this period a number of
meetings took place in Europe in different locations organised initially by European Geographical Information Systems EGIS
1990 94 and more recently by the Joint European Conference and Exhibition JEC on Geographical Information 1995 97 These
meetings brought together members of the GI community from across the world to discuss GI research and GIS applications
One of the Special Interest Groups associated with the JEC gatherings was that on Geographical Information and Planning
and several of the contributions in this book have their origins in papers presented to the group s meetings
