Some Doves Pythons:

The Uncoiling Python Harold Scheub, 2010-06-05 There are many collections of African oral traditions but few as carefully organized as The Uncoiling Python Harold Scheub one of the world's leading scholars of African oral traditions and folklore explores the ways in which oral traditions have served to combat and subvert colonial domination in South Africa From the time colonial forces first came to southern Africa in 1487 oral and written traditions have been a bulwark against what became 350 years of colonial rule characterized by the racist policies of apartheid The Uncoiling Python South African Storytellers and Resistance is the first in depth study of oral tradition as a means of survival In open insurrections and other subversive activities Africans resisted the daily humiliations of colonial rule but perhaps the most effective and least apparent expression of subversion was through indigenous storytelling and poetic traditions Harold Scheub has collected the stories and poetry of the Xhosa Zulu Swati and Ndebele peoples to present a fascinating analysis of how the apparently harmless tellers of tales and creators of poetry acted as front line soldiers

Quantitative Biosciences Companion in Python

Joshua S. Weitz, Nolan English, Alexander B. Lee, Ali Zamani, 2024-03-05 A hands on lab guide in the Python programming language that enables students in the life sciences to reason quantitatively about living systems across scales This lab guide accompanies the textbook Quantitative Biosciences providing students with the skills they need to translate biological principles and mathematical concepts into computational models of living systems This hands on guide uses a case study approach organized around central questions in the life sciences introducing landmark advances in the field while teaching students whether from the life sciences physics computational sciences engineering or mathematics how to reason quantitatively in the face of uncertainty Draws on real world case studies in molecular and cellular biosciences organismal behavior and physiology and populations and ecological communities Encourages good coding practices clear and understandable modeling and accessible presentation of results Helps students to develop a diverse repertoire of simulation approaches enabling them to model at the appropriate scale Builds practical expertise in a range of methods including sampling from probability distributions stochastic branching processes continuous time modeling Markov chains bifurcation analysis partial differential equations and agent based simulations Bridges the gap between the classroom and research discovery helping students to think independently troubleshoot and resolve problems and embark on research of their own Stand alone computational lab guides for Quantitative Biosciences also available in R and MATLAB
