

The Spectrum of Teaching Styles

The command style (a)

Teacher makes all the decisions before, during, and after the lesson. All exercises are performed after a certain stimulus, such as a whistle.

The practice style (b)

Teacher shows the task and gives room for learners to practice at their own pace. Teacher follows and gives feedback.

The reciprocal style (c)

Students work in pairs and take turns observing & giving feedback to each other using performance criteria.

The self-check style (d)

Similar to reciprocal style but students work on their own.

The inclusion style (e)

Teacher sets out tasks with varying levels of difficulty. Pupils decide which task is most appropriate for their abilities and motivations.

Guided discovery (f)

The teacher uses questions to guide the learners towards a single predetermined response or solution.

Convergent discovery (g)

Learners discover new content by producing a single correct response to an unfamiliar specific problem, question, or situation.

Divergent discovery (h)

Teacher designs problems that engage students to find multiple solutions.

Learner-designed individual program (i)

Students have the opportunity to design, develop and present a series of tasks organized into a personal program.

Learner-initiated style (j)

The learner initiates their own learning experience by deciding the learning intent, objectives, the logistics, procedures, and assessment criteria.

Self-teaching (k)

The learner accepts the decision-making roles of both teacher and learner.
