state defined by law or the language being the only one in some states for historical reasons cf Crystal 2003b 66 But in all cases it can be argued the population is living in an environment in which the English language is routinely in evidence publicly accessible in varying degrees and part of the nation's recent or present identity Crystal 2003b 66 It also has to be clarified what processes can lead to a global status of a language and if so called naive theories hold true For the purpose of examining this question further the concept of the lingua franca and the role of English as such will also be looked at Talking about English and its world influence it is inevitable to consider the roles and history of Britain and the United States In order to make the attempt of getting more precise numbers of speakers will be shown and it will be explained how these numbers came about and what they mean As obvious as it may seem English is dominant in so many spheres that it appears impossible to account for all of them thoroughly However the most significant domains will be explained as such in order to draw a connection between history present and future
