

The background of the cover is a dark, textured grey-green. Overlaid on this are several red ochre rock art motifs. At the top, there are stylized human figures with thin limbs and circular heads. Below them, a large, central figure of a kangaroo or wallaby is depicted in a similar red ochre color. The overall aesthetic is that of ancient indigenous art.

## **Time Before History:**

**Time before History** H. Trawick Ward, R. P. Stephen Davis Jr., 2018-06-15 North Carolina's written history begins in the sixteenth century with the voyages of Sir Walter Raleigh and the founding of the ill-fated Lost Colony on Roanoke Island. But there is a deeper, unwritten past that predates the state's recorded history. The region we now know as North Carolina was settled more than 10,000 years ago, but because early inhabitants left no written record, their story must be painstakingly reconstructed from the fragmentary and fragile archaeological record they left behind. *Time before History* is the first comprehensive account of the archaeology of North Carolina. Weaving together a wealth of information gleaned from archaeological excavations and surveys carried out across the state from the mountains to the coast, it presents a fascinating, readable narrative of the state's native past across a vast sweep of time from the Paleo-Indian period when the first immigrants to North America crossed a land bridge that spanned the Bering Strait through the arrival of European traders and settlers in the sixteenth and seventeenth centuries.

**The History of Sicily from the Earliest Times** Freeman, 1891

**A Literary History of Persia: From the earliest times until Firdawsí, 1902** Edward Granville Browne, 1908

**History, Imperialism, Critique** Asher Ghaffar, 2018-09-03 This book examines anti-imperialist thought in European philosophy. It features an international group of both emerging and established scholars who directly respond to Timothy Brennan's far-reaching call to rethink intellectual histories, literary histories, and the reading habits of postcolonialism in relation to the anti-imperialist tradition of critique. Each contributor rethinks postcolonial and world literature, Continental thought, and intellectual history in relation to anti-imperialist histories and traditions of critique through geographically diverse analysis. This book provides a forum for the next generation of scholars to draw on and engage with the marginal yet influential work of the first generation of dissidents within postcolonial studies. It will appeal to researchers and students in the field of postcolonial studies, world literature, geography, and Continental thought.

*Ideologies of History in the Spanish Golden Age* Anthony J. Cascardi, 1997-09-15 Spain in the sixteenth and seventeenth centuries was in the throes of modernization arising from trade with the New World and the rise of an urban society. During this period, Spanish culture came to be dominated by the tension between an old regime of traditional values—honor, lineage, purity of blood—and these modernizing influences. Anthony J. Cascardi examines the literature of the Golden Age as the point at which tensions between the old and the new converged and proposes that this historical drama provided the context for subject formation in early modern Spain. He examines how Spanish writers envisioned history and studies how these visions revealed or concealed contradictions between social values of their time, particularly between the value systems of caste and class. *Ideologies of History in the Spanish Golden Age* draws on recent theoretical paradigms in contemporary philosophy, psychoanalysis, political and social theory, and literary history to place Spain's major literary figures in challenging new contexts. By accounting for both modernizing desires and resistances,

to modernization Cascardi provides readers interested in theories of ideology and history with a new way of looking at the literature of the Spanish Golden Age A Cultural History of Physics Károly Simonyi, 2025-02-28 While the physical sciences are a continuously evolving source of technology and of understanding about our world they have become so specialized and rely on so much prerequisite knowledge that for many people today the divide between the sciences and the humanities seems even greater than it was when C P Snow delivered his famous 1959 lecture *The Two Cultures* In A Cultural History of Physics Hungarian scientist and educator Károly Simonyi succeeds in bridging this chasm by describing the experimental methods and theoretical interpretations that created scientific knowledge from ancient times to the present day within the cultural environment in which it was formed Unlike any other work of its kind Simonyi's seminal opus explores the interplay of science and the humanities to convey the wonder and excitement of scientific development throughout the ages These pages contain an abundance of excerpts from original resources a wide array of clear and straightforward explanations and an astonishing wealth of insight revealing the historical progress of science and inviting readers into a dialogue with the great scientific minds that shaped our current understanding of physics Beautifully illustrated accurate in its scientific content and broad in its historical and cultural perspective this book will be a valuable reference for scholars and an inspiration to aspiring scientists and humanists who believe that science is an integral part of our culture "An"
