Terrorist Attacks:

Preventing Terrorist Attacks at Sea Robin Bowley, 2022-12-23 Over recent decades it has been widely recognised that terrorist attacks at sea could result in major casualties and cause significant disruptions to the free flow of international shipping After discussing the overlaps and distinctions between piracy and maritime terrorism this book considers how the International Ship and Port Facility Security Code and other vessel identification and tracking measures in the 1974 International Convention for the Safety of Life at Sea would be likely to reduce the risk of terrorist attacks at sea It explains how the 1982 United Nations Convention on the Law of the Sea is less than clear on the powers of states to protect offshore installations submarine cables and pipelines from interference by terrorists In light of these uncertainties it considers how the 2005 Protocol to the Convention for the Suppression of Unlawful Acts Against Maritime Navigation the doctrine of necessity and states inherent self defence rights might apply in the maritime security context A significant contribution of the book is the formulation of the Maritime Terrorism Threat Matrix which provides a structured framework for examining how maritime terrorism incidents have occurred and might occur in the future The book also examines the relevant national maritime security legislation for preventing maritime terrorist attacks in the United Kingdom and in Australia The book concludes by formulating guidelines for the unilateral interdiction of suspected terrorist vessels in exceptional circumstances and recommending priorities for governments and international maritime industries to focus on in order to reduce the risk for terrorist attacks at sea It will be of interest to those working in the areas of Law and Terrorism Law of the Sea Maritime Law and Insurance and International Law **Library of Congress Subject Headings** Library of Congress, 2013

Criminology Theory and Terrorism Joshua D. Freilich, Gary LaFree, 2017-10-02 Although there has been an increase in research on terrorism across the social and behavioural sciences in the past few decades until recently most of this work has originated from political science psychology or economics Therefore our focus in this book on criminological conceptual frameworks and empirical studies that engage terrorism and responses to it is unique We include a distinguished group of researchers that offer their distinctive insights into criminological perspectives on terrorism The contributors focus on criminological perspectives that have rarely if ever been previously applied to the study of terrorism This includes a range of perspectives from rational choice to social disorganization from strain to routine activities theory This volume will advance understanding of terrorism by taking advantage of criminological contributions and at the same time will serve as a useful update to the criminologists and their students already working in this area It would also be a helpful introduction to those criminologists and their students who would like to be more engaged in this important area of research This book was originally published as a special issue of *Terrorism and Political Violence* Congressional Record United States. Congress, 2011 **Terrorist Organisations of the World** Niranjana Dass, 2005 **Congressional Record** United States. Congress, 2008 *The Enemy of My Enemy* George Michael, 2006 In the violent world of radical extremists the enemy of my

enemy is my friend This study reveals how that precept plays out in the unexpected bonding between militant Islam and the extreme right in America and Europe It provides an insightful and sane look at the possibilities for collaboration between these groups
