Circular Economy and System Thinking Framework in Design Mehrafza Mirzazad Barijugh, 2016 The purpose of this thesis is to bring the circular economy framework and system thinking into the process of design thinking The traditional design process is made up of five steps 1 Discover a challenge 2 Interpret the challenge 3 Create opportunities and ideas 4 Develop a solution and experiment with it 5 Evolve the idea This project is structured upon a methodology generated to apply a circular system framework in design that begins with taking a holistic view of topic This methodology structured into five phases The first phase is referring to this approach as moving from Macrocosm to Microcosm in other words the mapping of the connections and interconnections of the system The intersections of these cosmos create what I refer to as the main element or the brain for short Phase 1 The second phase is to deconstruct this brain Phase 2 and explore the elements within it The third phase is related with surveying The fourth

phase is defining problems based on the information I found during the past three phases The last part is the reconstruction of the brain using the circular framework Phase 5 Abstract
