The Handbook for the Future of Work Julie MacLeavy, Frederick Harry Pitts, 2024-12-26 *The Handbook for the Future of Work* offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty first century Focusing on the past two decades the handbook explores how technological advancements automation and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations Beyond simply outlining the challenges and opportunities of automation the

handbook integrates these emerging realities with established discussions of work. Importantly, it moves beyond dominant technology-centric narratives, probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models. With contributions from established and emerging authors based in institutions around the world, the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities, practices and sectors, politics and environments. The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries. A useful resource for students and researchers, the handbook serves as an essential guide to this new intellectual landscape.

Sociology and the Future of Work Paul Ransome, 2019-01-04

First published in 1999, this book adopts an explicitly forward-looking and dynamic approach in trying to understand not only where the sociology of work has come from but of where it is likely to go next. For the first time in a single volume, it reviews the continuing usefulness of the classical accounts of Karl Marx, Max Weber, and Emile Durkheim, the post-industrial accounts of the 1960s and 1970s, and the post-Fordist accounts of the 1980s and 1990s. It provides specific treatment of key topics such as technological change and flexibility, the impact of gender on work, the changing nature of the relationship between work and personal identity, and the possible emergence of economic globalization, all of which are currently receiving much academic and popular attention. The treatments of gender identity and globalization are challenging and innovative in that they go beyond simply describing current debates and question the validity of some of the premises on which they are based. For example, it is not possible to provide a unifying explanation of gender inequality at work because its causes are multiple rather than singular; that it is wrong to imply that work will cease to be an important basis of personal identity; and that evidence of economic globalization is far too patchy to justify the claim that we are living in a global economy. The text combines theoretical analysis with clear descriptions of the key arguments and tests these against current empirical data.

This volume comprises the papers and debates of the second France ILO Symposium on the future of work, employment and social protection. Reflecting the aim of the Symposium itself, the book provides in-depth reflections on work, employment and social protection. Designed to be more than an account of the discussions, this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets, particularly in the developed world. The book discusses the need for more family-friendly policies and a more radical policy of equality between the sexes. The legal dimensions of labour market
