complete exposition of the far reaching science which deals with the unfolding of consciousness These materials are slowly accumulating in the hands of earnest and painstaking students but no effort has yet been made to arrange and systematise them into a co ordinated whole In this little volume I have only arranged a small part of this material in the hope that it may be useful now to About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Seeing Red Nicholas Humphrey, 2006-03-31 Consciousness matters Arguably it matters more than anything The purpose of this book is to build towards an explanation of just what the matter is Nicholas Humphrey begins this compelling exploration of the biggest of big questions with a challenge to the reader and himself What s involved in seeing red What is it like for us to see someone else seeing something red Seeing a red screen tells us a fact about something in the world But it also creates a new fact a sensation in each of our minds the feeling of redness And that s the mystery Conventional science so far hasn t told us what conscious sensations are made of or how we get access to them or why we have them at all From an evolutionary perspective what s the point of consciousness Humphrey offers a daring and novel solution arguing that sensations are not things that happen to us they are things we do originating in our primordial ancestors expressions of liking or disgust Tracing the evolutionary trajectory through to human beings he shows how this has led to sensations playing the key role in the human sense of Self The Self as we now know it from within seems to have fascinating other worldly properties It leads us to believe in mind body duality and the existence of a soul And such beliefs even if mistaken can be highly adaptive because they increase the value we place on our own and others lives Consciousness matters Humphrey concludes with striking paradox because it is its function to matter It has been designed to create in human beings a Self whose life is worth pursuing
